IN

Illinois Wesleyan University.

COURSE OF STUDY.

SCIENTIFIC.

PREPARATORY.

English Grammar, Geography, Arithmetic, Reading, Natural Philosophy, Algebra, Davies' First Lessons, Composition and Declamation.

JUNIOR.

First Quarter.

Algebra,	Davies.
Ancient Geography,	Butler.
Physiology,	Jarvis.

Second Quarter.

Algebra, continued,	Davies.
Trigonometry,	Davies.
English Composition,	Parker.

Third Quarter.

Geometry,	Davies' Legendre.
Zoology,	Agazziz and Gould.
Mensuration,	Davies.
Navigation and Surveying,	Davies.

Fourth Quarter.

Geometry, continued,	Davies' Legendre.
Canic Sections,	Davies.
Astronomy,	Olmsted.

SENIOR.

First Quarter.

Natural Philosophy,	Olmsted.
Chemistry,	Johnsons' Turner.
Mental Philosophy,	Upham.

Second Quarter.

Natural Philosophy, continued,	Olmsted.
Chemistry, continued,	Johnson's Turner.
Logic,	Hedge.
Rhetoric,	Boyd.

Third Quarter.

Evidences of Christianity,	Paley.
Geology,	Hitchcock.
Integral Calculus,	Davies.

Fourth Quarter.

Botany,	Wood.
Moral Science,	Wayland.
Constitutional Law,	Story.
Political Economy,	Wayland.

Exercises in Composition and Declamation, weekly, through the entire course.

PREPARATORY.

English Grammar, Geography, Arithmetic, Reading, Natural Philosophy, M'Clintock's and Crooks' Latin and Greek Lessons, Bullions' Cæsar, Cooper's Virgil, (Grammar and Prosody,) Anthon's Cicero, (four orations,) Bullions' Greek Reader, Fiske's Classical Geography and Chronology, (weekly recitations,) Arnold's Latin Exercises, Boise's Greek Exercises, Elementary Algebra, Composition and Declamation.

FRESHMAN.

First Quarter.

Homer's Iliad, (six books,)	Anthon.
Virgil's Æneid, continued,	Cooper.
Algebra,	Davies.

Second Quarter.

Anabasis,	Cleaveland.
Cicero's Select Orations,	Anthon.
Algebra, continued,	Davies.

Third Quarter.

Livy,	Lincoln.
Geometry,	Davies' Legendre.
Physiology,	Jarvis.

Fourth Quarter.

Greek Exercises, (completed,)	Arnold.
Latin Exercises, (second part.)	Arnold.
Geometry, continued,	Davies' Legendre.
Mythology, Greek and Roman Antiquities, throughout the year, weekly,	Fiske.

SOPHOMORE.

First Quarter.

Thucydides,	Owen.
Cicero de officiis,	Thatcher.
Plane and Spher. Trigonometry,	Davies.

Second Quarter.

Xenophon's Memorabilia,	Anthon.
Horace, Odes and Epodes,	Anthon.
Mensuration,	Davies.

Third Quarter.

Tacitus,	Tyler.
Zoology,	Agazziz and Gould.
Navigation and Surveying,	Davies.

Fourth Quarter.

Tacitus, continued,	Tyler.
Astronomy,	Robinson.

Conic Sections,	Davies.
Archæology of Literature and Art, and Hist. of Greek and Roman Literature, (weekly)	Fiske.

JUNIOR.

First Quarter.

Cicero de Natura Deorum,	Dilloway.
Natural Philosophy,	Robinson.
Chemistry,	Johnson's Turner.

Second Quarter.

Eschines et Demosthenes de corona,	Negris.
Natural Philosophy, continued,	Robinson.
Chemistry, continued,	Johnson's Turner.

Third Quarter.

Cicero de Oratore,	Anthon.
Mental Philosophy,	Upham.
Logic,	Hedge.

Fourth Quarter.

Geology,	Hitchcock.
Integral Calculus, and Shadows and Perspective,	Davies.
Natural Theology,	Paley.

SENIOR.

First Quarter.

Tragedies of Euripides and Sophocles,	Woolsey.
Mineralogy,	Dana.
Evidences of Christianity,	Paley.

Second Quarter.

Juvenal,	Leverett.
Rhetoric,	Boyd.
Elements of Criticism,	Kames.

Third Quarter.

Political Economy,	Wayland,
Botany,	Wood.
English Language,	Fowler.

Fourth Quarter.

Botany, continued,	Wood.
Constitutional Law,	Story.
Moral Science,	Wayland.
Greek Testament.	

Weekly Exercises in Composition and Declamation through the entire course.

CALENDAR.

The first quarter of the term for 1852-3 will commence September 28th, 1852.

Second quarter, - -	Dec. 7,	1852.
Third " - -	Feb. 18,	1853.
Fourth " - -	April 28,	"
Semi-annual Examination,	Feb. 15, 16, 17,	"
" Exhibition,	Feb. 17,	"
Annual Examination,	June 28, 29,	"
" Commencement,	July 1,	"

LOCATION.

The Illinois Wesleyan University is located at Bloomington, Illinois; in a healthful and delightful region of country, and near the geographical centre of the State. Bloomis connected with the river, at Peoria, distant 40 miles, by stage route, and is a point on the route of the Illinois Central Rail-road. Our inland position, the enterprise and intelligence of the community, the high tone of morals among us, and the remarkable healthfulness of our city and vicinity, all indicate the judicious location of the University.

PATRONAGE.

The Illinois Annual Conference of the Methodist Episcopal Church formally recognises the University as under its patronage, and at each session appoints a Board of Visitors to represent the Conference in the Board of Trustees.

LIBRARY & CABINET.

The Library consists of about 1000 volumes, the donations of the friends of the Institution: and there are on the shelves of the Cabinet about 1700 specimens. It is intended to greatly increase the value of the Library and Cabinet during the ensuing year.

APPARATUS.

The Philosophical and Chemical Apparatus and Chemicals are new and valuable, having been selected with care from the extensive catalogue of Messrs. Chamberlayne and Ritchie, Boston, and the Messrs. Carpenter, Philadelphia; and they afford ample facilities for the illustration of the Natural Sciences.

LECTURES.

An Arrangement has been made by which Public Lectures will be delivered in the chapel once a week, during the ensuing year, by the members of the faculty, assisted by several professional gentlemen of the city.

RELIGIOUS INSTRUCTION.

Prayers, with reading of the Scriptures, are attended in the chapel, by every student, morning and evening of every day, except on Saturday and Sunday, when the evening service is omitted. The students are also required to attend public service twice on the Sabbath, at such church as the Faculty understand to be preferred by parents or guardians. There are in the city seven houses of religious worship, belonging to as many different denominations.

QUARTERLY REPORTS.

Daily Records of the proficiency of each student, and of his deficiencies, are made and forwarded, with the statement of his general deportment, at the close of each quarter, and at other times if desired, to his parent or guardian.

COURSE OF STUDY.

In order to meet the wants of our times, two courses of study are arranged, and left optional with the student.

The course of study in the *Scientific* Department is arranged with reference to the wants and wishes of a large class of young men whose time, or means, or other circumstances do not admit of their pursuing the regular collegiate course. The object of it is thoroughly to prepare young men for teaching, or for business pursuits, by a thorough course of useful and systematic training. It embraces all the studies of the collegiate course except the Ancient Languages; and upon its successful completion the student is entitled to the Degree of "Bachelor of Science and English Literature." After leaving the Preparatory Department it may be completed in two years.

The course of *Collegiate* Study is, in the main, the same as is pursued at the oldest and best colleges in the United States. After the Preparatory studies, the completion of the course requires four years, and entitles the student to the Degree of "Bachelor of Arts." This course is the only reliable one for making sound, practical, and accomplished scholars.

THE GERMAN LANGUAGE.

Arrangements have been made by which the services of an accomplished teacher of the German Language can be secured as soon as there may be a demand for such instruction.

TEXT BOOKS.

All the text books used in the University can be obtained, at low rates, in this city.

BOARDING.

Boarding may be obtained in the city for from $1 50 to $2 00 per week. This charge includes room rent, furniture, and fuel, but does not include washing or lights. Many young men greatly lessen their expenses at college by boarding themselves, which can be done for from 60 to 80 cents per week. Others accomplish the same object by laboring a part of each day or each week. This plan profitably occupies the student's vacant hours, and affords him healthful exercise. The Faculty desire to encourage such praiseworthy effort, and the rapidly progressing improvements of all kinds, in the city, furnish an abundant demand for all kinds of labor.

VACATION

Extends from the Commencement Exercises to October following, embracing twelve weeks. Our climate and the prevalent occupations of the country unite to indicate the propriety of having all the vacation time occur in the summer months.

THE ACADEMICAL DEPARTMENT

Will be under the immediate supervision of the Faculty, assisted by such Tutors as may be necessary to accomplish the work. It is preferred that students preparing for the college classes would make their preparation here rather than perpare elsewhere for an advanced standing. If we must be responsible for the final credentials of the scholar we would prefer laying the foundation of his scholarship.

PRE-PAYMENT.

Tuition bills are to be paid quarterly before the student's name is recorded on the class-books, and tuition fees are only refunded in cases of protracted sickness.

COLLEGE EDIFICE.

It is the purpose of the Trustees to commence, next year, the erection of a New College Edifice. For the present the basement of the M. E. Church is used for recitation rooms and chapel. One hundred and fifty Students can be accommodated with the conveniences we now have, and as soon as necessary additional rooms will be obtained for recitation.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all college exercises, and careful observance of study hours, and gentlemanly deportment. are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the sabbath day — absences from rooms at improper hours, or unpermitted absences from town — writing upon or defacing the furniture or rooms of the college or of other public buildings — wearing fire-arms or other weapons — drinking intoxicating liquors, or keeping them except by the prescription of a physician — contracting debts without the knowledge or consent of parents or guardians — using obscene or profane language — refusing compliance with any requirement of the Faculty — and all other breaches of morals or good order or violations of gentlemanly demeanor are strictly and totally forbidden.

No student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

Lectures during the year, on Astronomy, the Philosophy of History, and the History of Philosophy.

CALENDAR FOR 1858 & '9.

Fall Term begins Wednesday, September 15th.
" ends " December 22d.
Winter Term begins Wednesday, December 29th.
" ends " March 23d.

Summer Term begins Wednesday, March 30th.
" ends Thursday, July 7th.

EXPENSES.

PAYABLE IN ADVANCE.

Tuition, Preparatory Department, per quarter,		$5,00
" Collegiate " "		6,00
" French or German Language, extra, per quarter,		3,75
Contingent Expenses,	"	75

LOCATION.

The Illinois Wesleyan University is located in the city of Bloomington, McLean county, Illinois, in a healthful and delightful region of country, near the geographical centre of the State, and at the intersection of the two great leading thoroughfares of travel, viz: the "Illinois Central" and the "St. Louis, Alton & Chicago" railroads. It is thus rendered easy of access at all times from all parts of our extended commonwealth. Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an Institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Peoria Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instruction imparted within its halls.

LIBRARY.

The nucleus of a valuable Miscellaneous and Scientific Library has been secured, (to which important additions have been made during the past year,) which is open to the use of Studeuts, free of charge.

Apparatus.

The Philosophical and Chemical Apparatus and Chemicals, were selected with care in the eastern cities, and afford desirable facilities for the illustration of the Natural Sciences.

Religious Instruction.

While all sectarianism will be rigidly excluded, the faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality but of an evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate; they will also be required to attend the regular daily worship in the College Chapel.

Lectures.

Regular Courses of Lectures will be delivered in connection with the regular recitations in the departments of Natural Science and of Mental and Moral Philosophy.

Quarterly Reports.

Daily records of the proficiency and deportment of every Student will be kept, and will, if desired, be furnished quarterly to his parents or guardians.

The French and German Languages.

Arrangements have been made by which the services of an accomplished Teacher in this department have been secured to meet the wants of those desiring to acquaint themselves with these languages.

Examinations.

There will be a regular Public Examination of all the Classes at the close of each Term; and Students will be advanced only after such examinations.

Text Books.

All the Text Books used in the University can be obtained at reasonable rates in this city.

Course of Study.

This has been arranged with much care, after a close comparison of the standards of the best Institutions in our country, and is designed to meet the varied wants of the youth of our rapidly developing commonwealth.

The curriculum in the Scientific Department has been arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course. It is designed to discipline the mind and prepare young men for teaching and for the ordinary business pursuits of life. It embraces all the studies of the Classical Course, except the ancient languages, together with some special studies deemed desirable. It can be completed in three years, and will entitle the successful candidate to the degree of Bachelor of Science.

The Classical Course, it will be observed, is full and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts. We cannot too earnestly recommend Students, when it is practicable, to avail themselves of its advantages.

Composition and Declamation.

All the Students will be exercised weekly in these important branches of a liberal education. And the Junior and Senior Classes will be required to engage also in forensic disputations.

Preparatory Department.

This will be under the immediate supervision of the Faculty, assisted by such Tutors as may be necessary to accomplish the work. It is preferred that Students preparing for the College Classes should make their preparation here rather than prepare elsewhere for an advanced standing. If we must be responsible for the final credentials of the scholar, we would prefer laying the foundation of his scholarship.

Literary Society.

A young but enterprising Association of this kind, has been organized and put in successful operation during the year, and promises much of interest and usefulness for the future.

Pre-Payment.

Tuition bills are expected in all cases to be paid in advance, but will be refunded pro rata in case of protracted sickness.

Boarding.

In the College Boarding House, can be had at the following rates per week, viz:

Boarding, - - -	$2,25
Room-rent, - - -	25
TOTAL, ——	$2,50

Students will be expected to furnish their own room furniture, fuel and lights. Boarding in private families, with fuel, lights and rooms furnished can be had at from $2,75 to $3,00 per week.

Self Boarding.

A new building has been erected on the College Campus for the special accommodation of Students who may desire to board themselves. Many young men by availing themselves of its advantages, have been able to reduce their expenses during the current year to less than one dollar per week.

College Edifice.

This is new, spacious and convenient; beautifully located in a pleasant grove in the northern part of the city. It affords the necessary accommodations in the way of Chapel, Recitation Rooms, &c., for two hundred and fifty Students.

Government.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

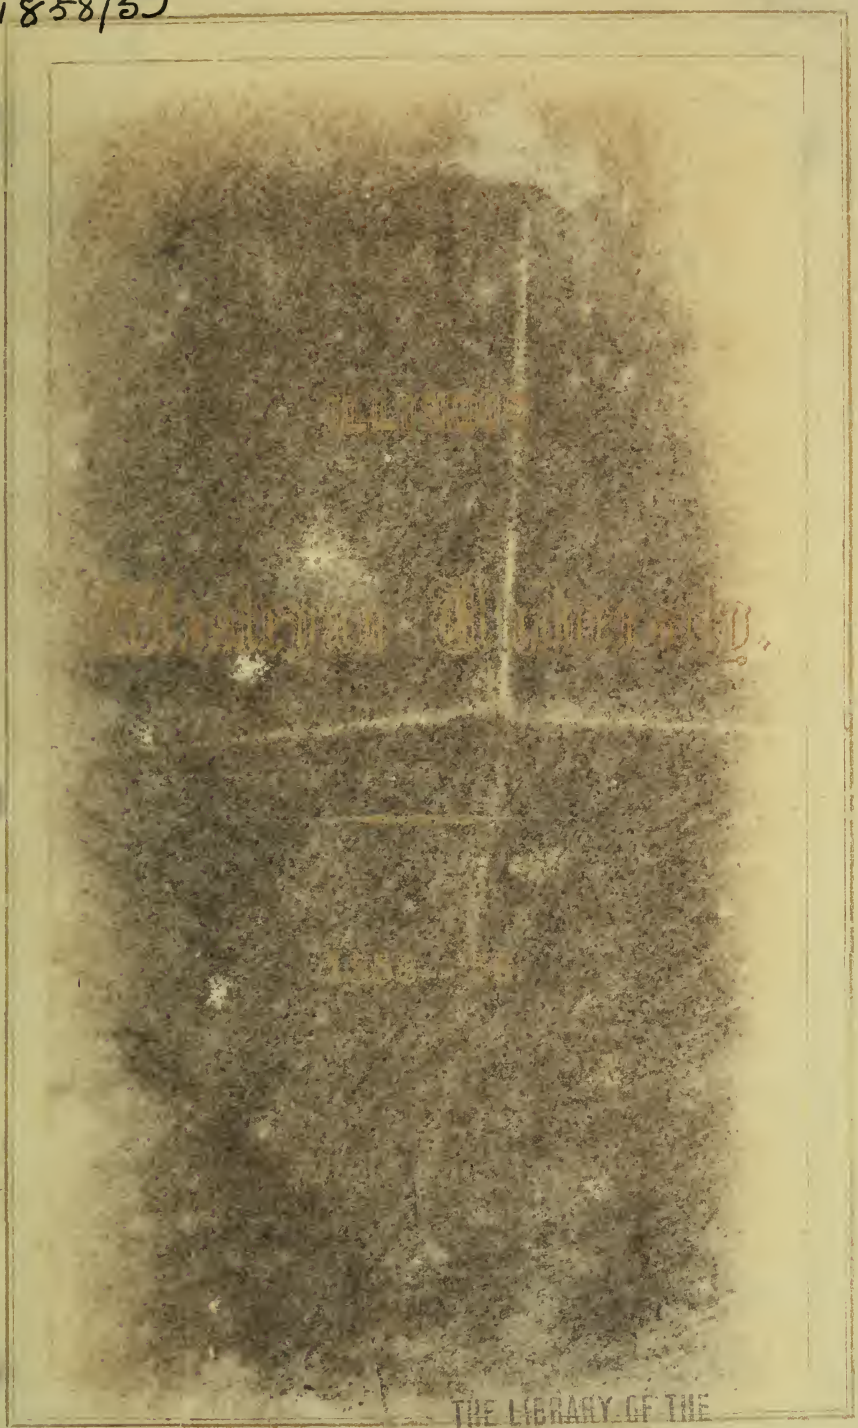

Punctuality in attendance at all college exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student.—Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absences from town—writing upon or defacing the furniture or rooms of the college or of other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order or violations of gentlemanly demeanor, are strictly and totally forbidden.

No student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

The Steward will have charge of the Buildings and Campus; and will exercise a general supervision in the absence of the Faculty; and will be required to report all infractions of order to the President.

Moral Science... *Wayland.*
Mineralogy... *Dana.*
German or French.

Third Term.

Cicero de Natura Deorum.
Psychology... *Cousin.*
Logic... *Whately.*
History of Philosophy... *Henry.*

Lectures during the year, on Astronomy, the Philosophy of History, and the History of Philosophy.

CALENDAR FOR 1860 & 1861.

Fall Term begins Monday, September 10th.
" ends Thursday, December 20th.
Winter Term begins Wednesday, January 2d.
" ends Thursday, March 28th.
Summer Term begins Monday, April 1st.
" ends Thursday, June 27th.

Expenses.

PAYABLE IN ADVANCE.

Tuition,	Preparatory	Department,	per quarter of 10 weeks,	$5	00
"	Collegiate	"	" "	6	00
"	French or German	Language,	extra, per quarter,	3	75
Contingent	Expenses,	-	- "		75

Location.

The Illinois Wesleyan University is located in the city of Bloomington, McLean county, Illinois, in a healthful and delightful region of country, near the geographical centre of the State, and at the intersection of the two great leading thoroughfares of travel, viz: the "Illinois Central" and the "St. Louis, Alton & Chicago" railroads. It is thus rendered easy of access at all times from all parts of our extended commonwealth. Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an Institution.

Patronage.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instruction imparted within its halls.

Library.

The nucleus of a valuable Miscellaneous and Scientific Library has been secured, (to which important additions have been made during the past year,) which is open to the use of Students, free of charge.

Apparatus.

The Philosophical and Chemical Apparatus and Chemicals, were selected with care in the eastern cities, and afford desirable facilities for the illustration of the Natural Sciences.

Cabinet.

During the past year, the nucleus of an interesting and valuable cabinet of Mineralogy, Geology and Zoology, has been secured, to which additions will be made from year to year. Contributions to it will be gratefully received at any time.

Religious Instruction.

While all sectarianism will be rigidly excluded, the faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate; they will also be required to attend the regular daily worship in the College Chapel.

Lectures.

Regular Courses of Lectures will be delivered in connection with the regular recitations in the departments of Natural Sciences and of Mental and Moral Philosophy.

Quarterly Reports.

Daily Records of the proficiency and deportment of every Student will be kept, and will, if desired, be furnished quarterly to his parents or guardians.

Examinations.

There will be a regular Public Examination of all the Classes at the close of each Term; and Students will be advanced only after such examinations.

Text Books.

All the Text Books used in the University can be obtained at reasonable rates in this city.

Course of Study.

This has been arranged with much care, after a close comparison of the standards of the best Institutions in our country, and is designed to meet the varied wants of the youth of our rapidly developing commonwealth.

The curiculum in the Scientific Department has been arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course. It is designed to discipline the mind and prepare young men for teaching and for the ordinary business pursuits of life. It embraces all the studies of the Classical Course, except the ancient languages, together with some special studies deemed desirable. It can be completed in three years, and will entitle the successful candidate to the degree of Bachelor of Science.

The Classical Course, it will be observed, is full and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts. We cannot too earnestly recommend Students, when it is practicable, to avail themselves of its advantages.

Composition and Declamation.

All the Students will be exercised weekly in these important branches of a liberal education. And the Junior and Senior Classes will be required to engage also in forensic disputations.

Preparatory Department.

This will be under the immediate supervision of the Faculty, assisted by such Tutors as may be necessary to accomplish the work. It is preferred that Students preparing for the College Classes should make their preparation here rather than prepare elsewhere for an advanced standing. If we must be responsible for the final credentials of the scholar, we would prefer laying the foundation of his scholarship.

Literary Societies.

Two young but enterprising Associations of this kind are in successful operation, and promise much of interest and usefulness for the future.

Pre-Payment.

Tuition bills are expected in all cases to be paid in advance, but will be refunded pro rata in case of protracted sickness.

Boarding

In the College Boarding House, can be had at the following rates per week, viz:

Boarding, - - -	$2,25
Room-rent, - - -	25
TOTAL, ——	$2,50

Students will be expected to furnish their own room furniture, fuel and lights. Boarding in private families, with fuel, lights and rooms furnished, can be had at from $2,75 to $3,00 per week.

Self Boarding.

A new building has been erected on the College Campus for the special accommodation of Students who may desire to board themselves. Many young men by availing themselves of its advantages, have been able to reduce their expenses during the current year to less than one dollar per week.

College Edifice.

This is new, spacious and convenient, beautifully located in a pleasant grove in the northern part of the city. It affords the necessary accommodations in the way of Chapel, Recitation Rooms, &c., for two hundred and fifty Students.

Government.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pusruits.

Punctuality in attendance at all college exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absences from town—writing upon or defacing the furniture or rooms of the college or of other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

The Steward will have charge of the Buildings and Campus; and will exercise a general supervision in the absence of the Faculty; and will be required to report all infractions of order to the President.

Course of Study.

This has been arranged with much care, after a close comparison of the standards of the best Institutions in our Country, and is designed to meet the varied wants of the youth of our rapidly developing commonwealth.

The curiculum in the Scientific department has been arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course. It is designed to discipline the mind and prepare young men for teaching and for the ordinary business pursuits of life. It embraces all the studies of the Classical Course, except the ancient languages, together with some special studies deemed desirable. It can be completed in three years, and will entitle the successful candidate to the degree of Bachelor of Science.

The Classical Course, it will be observed, is full and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts. We cannot too earnestly recommend Students, when it is practicable, to avail themselves of its advantages.

Composition and Declamation.

All the Students will be exercised weekly in these important branches of a liberal education. And the Junior and Senior Classes will be required to engage also in forensic disputations.

Preparatory Department.

This will be under the immediate supervision of the Faculty, assisted by such Tutors as may be necessary to accomplish the work. It is preferred that Students preparing for the College Classes should make their preparation here rather than prepare elsewhere for an advanced standing. If we must be responsible for the final credentials of the scholar, we would prefer laying the foundation of his scholarship.

Literary Societies.

A young but enterprising Association of this kind is in successful operation, and promises much of interest and usefulness in the future.

Boarding.

Good Boarding can be obtained in respectable private families in the city, at prices ranging from $2.50, to $3.00 per week; with fuel, lights, and rooms furnished.

Self Boarding.

A new building has been erected on the College Campus for the special accommodation of Students who may desire to board themselves. Many young men by availing themselves of its advantages, have been able to reduce their expenses during the current year to less than one dollar per week.

College Edifice.

This is new, spacious and convenient, beautifully located in a pleasant grove in the northern part of the city. It affords the necessary accommodations in the way of Chapel, Recitation Rooms, &c., for two hundred and fifty Students.

Government.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all college exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath Day—absences from rooms at improper hours, or unpermitted absences from town—writing upon or defacing the furniture or rooms of the college or of other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

Course of Instruction, Expenses, &c.,

IN THE

ILLINOIS WESLEYAN UNIVERSITY.

COURSE OF STUDY.

SCIENTIFIC.

PREPARATORY.

Arithmetic, English Grammar, Natural Philosophy, Elements of Algebra, History of the United States.

FRESHMAN CLASS.

FIRST TERM.

Algebra—Loomis.
Anatomy, Physiology and Hygiene—Cutler.
Analytic Grammar—Greene.
English Exercises.

SECOND TERM.

Algebra, Completed—Loomis.
Rhetoric and English Composition—Quackenbos.
Physical Geography—Guyot's Earth and Man.
English Exercises.

THIRD TERM.

Geometry, Commenced—Loomis.
Logic—True.
Chemistry—Yeomans.
English Exercises.

SOPHOMORE CLASS.

FIRST TERM.

Geometry, Finished—Loomis.
Conic Sections—Loomis.
Chemistry, Applied—Johnston's Chemistry of Agriculture.
Rhetoric—Whateley.

SECOND TERM.

Plane and Spherical Trigonometry—Loomis.
Mensuration and Navigation—Loomis.
Surveying and Leveling—Loomis.
Natural History, Principles of Classification—Agassiz.
Natural Philosophy, Commenced—Olmstead.

THIRD TERM.

Analytical Geometry—Loomis.
Natural Philosophy, Finished—Olmstead.
Natural History, Zoology—Agassiz & Gould.

JUNIOR CLASS.

FIRST TERM.

Differential and Integral Calculus—Loomis.
Natural History—Ruschenberger.
Mineralogy—Dana's Manual.

SECOND TERM.

Geology—Lyell's Elements.
Universal History—Weber.
Astronomy—Robinson.

THIRD TERM.

Geology—LYELL'S PRINCIPLES.
Botany—GRAY.
Political Economy—WAYLAND.

SENIOR CLASS.

FIRST TERM.

Practical Entomology. Insects injurious to Vegetation—HARRIS.
English Language—FOWLER.
Political Grammar—MANSFIELD.

SECOND TERM.

Intellectual Philosophy—HAVEN.
English Language—FOWLER.
Moral Science—WAYLAND.

THIRD TERM.

Laws of Nations—VATTEL.
Psychology—COUSIN.
History of Philosophy—HENRY.

CLASSICAL.

PREPARATORY.

McClintock's and *Crook's* Latin Lessons, *Cæsar*, *Virgil's* Æneid. *Cicero's* Orations, *McClintock's* First and Second Books in Greek, *Xenophon's* Anabasis, *Loomis'* Elements of Algebra.

FRESHMAN CLASS.

FIRST TERM.

Sallust—*Anthon.*
Latin Archæology and Exercises.
Cyropædia—*Xenophon.*
Greek Grammar, (large edition,)—*Kuhner.*
Algebra—*Loomis.*
Anatomy, Physiology and Hygiene—*Cutler.*

SECOND TERM.

Cicero de Senectute et Amicitia.
Latin Literature and Exercises
Herodotus.
Algebra, Completed—*Loomis.*
English Language—*Fowler.*

THIRD TERM.

Livy—*Zumpt.*
Latin Antiquities and Exercises.
Memorabilia—*Xenophon.*
Geometry, Commenced—*Loomis.*

SOPHOMORE CLASS.

FIRST TERM.

Horace, Odes—*Anthon.*
Iliad—*Homer.*
Greek Archæology and Exercises.
Geometry, Completed—*Loomis.*
Conic Sections—*Loomis.*
Zoology—*Agassiz & Gould.*

SECOND TERM.

Epistles of Horace.
Quinctilian.
Euripides.
Greek Literature and Exercises.
Plane and Spherical Trigonometry—*Loomis.*
Mensuration and Navigation—*Loomis.*
Leveling and Surveying—*Loomis.*

THIRD TERM.

Tacitus—*Tyler.*
Agamemnon—*Æschylus.*
Greek Antiquities and Exercises.
Analytical Geometry—*Loomis.*

JUNIOR CLASS.

FIRST TERM.

Philippics—*Demosthenes.*
Differential and Integral Calculus—*Loomis.*
Chemistry.
German or French.

SECOND TERM.

Natural Philosophy—*Olmstead.*
Rhetoric—*Whately.*
Gorgias—*Plato.*
German or French.

THIRD TERM.

Natural Philosophy—*Olmstead.*
Geology—*Lyell.*
Political Economy—*Wayland.*
Political Grammar—*Mansfield.*
German or French.

Lectures during the year, on Mechanics, Hydrostatics, Pneumatics, Aucoustics, Optics, Electricity, Magnetism, Electro-Magnetism, Geology, and Political Economy.

SENIOR CLASS.

FIRST TERM.

Astronomy—A *Olmstead.*
Intellectual Philosophy—*Haven.*
Universal History—*Weber.*
Natural Theology.

SECOND TERM.

Laws of Nations—*Vattel.*
Moral Science—*Wayland.*
Mineralogy—*Dana.*
German or French.

THIRD TERM.

Cicero de Natura Deorum.
Psychology—*Cousin.*
Logic—*True.*
History of Philosophy—*Henry.*

Lectures during the year, on Astronomy, the Philosophy of History, and the History of Philosophy.

CALENDAR FOR 1862 AND 1863.

Fall Term begins Wednesday, Sept. 10th, ends Wednesday, Dec. 24th.
Winter Term begins Monday, Jan. 5th, ends Thursday, April 2d.
Summer Term begins Monday, April 6th, ends Thursday, July 2d.

EXPENSES.

PAYABLE IN ADVANCE:

For FALL TERM of Fifteen Weeks:

Tuition in English Preparatory Department, - - -	$7 50
" in Classical, Preparatory, and Collegiate Dep,	9 00
Contingent Fee, - - - - - - -	1 25

For WINTER TERM of Twelve Weeks

Tuition in English Preparatory Department, - - -	$6 00
" in Classical, Preparatory, and Collegiate Dep.,	7 20
Contingent Fee, - - - - - - -	1 00

For SUMMER TERM of Thirteen Weeks:

Tuition in English Preparatory Department, - - -	$6 50
" in Classical, Preparatory, and Collegiate Dep.,	7 80
Contingent Fee, - - - - - - -	75

No DEDUCTIONS will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from the time of entrance.

LOCATION.

The Illinois Wesleyan University is located in the city of Bloomington, McLean county, Illinois, in a healthful and delightful region of country, near the geographical centre of the State, and at the intersection of the two great leading thoroughfares of travel, viz: the "Illinois Central" and the "St. Louis, Alton & Chicago" railroads.—It is thus rendered easy of access at all times from all parts of our extended commonwealth. Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an Institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting

Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instruction imparted within its halls.

LIBRARY.

The nucleus of a valuable Miscellaneous and Scientific Library has been secured, which is open to the use of Students, free of charge.

APPARATUS.

ARRANGEMENTS are now being perfected to secure at an early day, large and important additions to the Philosophical and Chemical Apparatus and Chemicals of the Institution, by means of which it is confidently expected that a greatly increased degree of interest can be thrown around the PRACTICAL study of the natural sciences.

MUSEUM.

DURING the past year, large and very valuable additions have been made to the Museum of Natural History, particularly in the departments of Geology and Palæontology, by a contribution from the State Cabinet of Geology at Springfield. And arrangements are now being made, by which, it is confidently expected, that several thousand additional specimens in the same departments will be added in the course of a few months. In addition to the facilities thus offered to students by our own now extensive cabinet, we have made arrangements with the Curator of the State Natural History Society, by which we are authorized to announce that our classes in the Natural Sciences will be admitted to the unrestricted use of their very ex-

tensive collection, now numbering about 60,000 specimens; thus offering facilities for the PRACTICAL study of the Natural Sciences.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate; they will also be required to attend the regular daily worship in the College Chapel.

LECTURES.

Regular Courses of Lectures will be delivered in connection with the regular recitations in the departments of Natural Sciences and of Mental and Moral Philosophy.

QUARTERLY REPORTS.

Daily Records of the proficiency and deportment of every Student will be kept, and will, if desired, be furnished quarterly to his parents or guardians.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each Term; and Students will be advanced only after such examinations.

TEXT BOOKS.

All the Text Books used in the University can be obtained at reasonable rates in this city.

COURSE OF STUDY.

This has been arranged with much care, after a close comparison of the standards of the best Institutions in our country, and is designed to meet the varied wants of the youth of our rapidly developing commonwealth.

☞ The curriculum in the Scientific department has been rearranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course. ☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Classical Course, except the ancient languages, together with many special studies deemed desirable. It can be completed in four years, and will entitle the successful candidate to the degree of Bachelor of Science.

The Classical Course, it will be observed, is full and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts. We cannot too earnestly recommend Students, when it is practicable, to avail themselves of its advantages.

COMPOSITION AND DECLAMATION.

All the Students will be exercised regularly in these important branches of a liberal education. And the Junior and Senior Classes will be required to engage also in forensic disputations.

PREPARATORY DEPARTMENT.

This will be under the immediate supervision of the Faculty, assisted by such Tutors as may be necessary to accomplish the work. It is preferred that Students prepar-

ing for the Collegiate Classes should make their preparation here rather than prepare elsewhere for an advanced standing. If we must be responsible for the final credentials of the scholar, we would prefer laying the foundation of his scholarship.

LITERARY SOCIETY.

The Belles Lettres Society, a spirited association of energetic young men, will, at the opening of the next collegiate year, occupy their NEW, SPACIOUS and BEAUTIFUL Society Hall, which is now being fitted up handsomely for their exclusive use, and will, at the same time, we trust, enter upon a new career of self-culture and intellectual development.

BOARDING.

Good Boarding can be obtained in respectable private families in the city, at prices ranging from $2.00, to $3.00 per week; with fuel, lights, and rooms furnished.

SELF BOARDING.

A new building has been erected on the College Campus for the special accommodation of Students who may desire to board themselves. Many young men by availing themselves of its advantages, have been able to reduce their expenses during the current year to less than one dollar per week.

COLLEGE EDIFICE.

This is new, spacious and convenient, beautifully located in a pleasant grove in the northern part of the city. It affords the necessary accommodations in the way of Chapel, Recitation Rooms, &c., for two hundred and fifty students.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all college exercises, and careful observance of study hours, and gentlemanly deportment, are required of every student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath Day—absences from rooms at improper hours, or unpermitted absences from town—writing upon or defacing the furniture or rooms of the college or of other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

CIRCULAR.

ILLINOIS WESLEYAN UNIVERSITY,
BLOOMINGTON, June 26th, 1862.

DEAR SIR:

Permit me to call your attention, very specially, to the NEW and GREATLY ENLARGED Course of Study in the Natural Sciences, adopted by the Board of Trustees of the Illinois Wesleyan University at their recent annual meeting. The course hitherto prescribed by the Statutes of the University, for candidates for academical honors, although fully as comprehensive and complete as those usually adopted by similar Institutions, has long been felt to be inadequate to the wants of the rising generation, and altogether out of proportion to the rapid progress of the sciences during the last quarter of a century. Until the present year, however, the way has not seemed to be open for any enlargement in this direction; for it was deemed idle to add text books to the course of study in the Natural Sciences so long as the instruction was necessarily limited to theory unaccompanied by practical illustrations drawn from comprehensive cabinets of Natural History, and properly fitted Chemical Laboratories. It is, therefore, with peculiar pleasure, that we now announce that these difficulties have been, and are being overcome. During the past year, very extensive additions have been made to our already valuable Museum, not only by private munificence, but also by a very liberal donation from the State Cabinet of Geology, illustrating very fully the Geology of Illinois. In addition to the facilities thus secured, we have obtained, by arrangement with the officers of the State Natural History Society, the privilege of unrestricted access by our classes in the Natural Sciences to the very extensive cabinet of that Society, now located permanently in our city. The value of this privilege may be estimated in view of the fact that that cabinet now contains near sixty thousand specimens in the departments of Geology, Ornithology, Botany, and Entomology, thus opening the way for the STRICTLY PRACTICAL study of these valuable sciences. Arrangements also are now being made to secure at an early date, a very large addition to our Chemical and Philosophical Apparatus, so as to render practicable a corresponding advance in the departments of Chemistry and Natural Philosophy In order to secure to the fullest extent the advantages thus placed within our reach, we have added to our Course of Study a second term in Chemistry, which we propose to devote to the Chemistry of Agriculture, using as a text book, Johnston's celebrated

work; this will be followed by four terms in Natural History, viz:—first by Agassiz's Principles of Classification, mapping out the field: secondly, by Agassiz & Gould's Zoology, treating of the Laws of Animal Life; and thirdly, by Ruschenberger's Manual of Natural History, including treatises on Mammology, Ornithology, Herpetology, Conchology and Entomology, the recitations to be strictly PRACTICAL and FULLY ILLUSTRATED by reference to the appropriate departments in the MUSEUM and in the FIELD. To Botany, particular attention will be paid, and students will in all cases be required to make collections of indigenous plants properly arranged and classified for preservation.—Following Botany, a term will be allotted to practical Entomology, using as a special text book, Harris's great work on insects injurious to vegetation; and particular attention will be directed to collecting and determining the Genera, Species, Habits, &c., of the insects most destructive to the Farmers and Horticulturists of Illinois. To Geology and Mineralogy also, an additional term each, will be added, using the very best text books, and illustrating very fully the Geology of the West as a specialty. To Anatomy and Physiology, Physical Geography, Natural Philosophy, Astronomy, &c., &c., due proportionate attention will of course, be paid. In a word, in addition to the usual course of study, we propose to add nearly one full year's work, devoted exclusively to strictly practical natural science, bearing directly upon the great Agricultural and material interests of our noble State. We design to make it preeminently the Farmer's and Business Man's course of study, and to them we confidently appeal for a generous support and patronage. Farmers of Illinois, you have long asked for such a course of Collegiate instruction, it is now offered to you; may we not then confidently look for your cordial sympathy and earnest co-operation. Give us thus, and that which is now but an untried experiment will speedily become a reality fraught with untold blessings to the people of the Prairie State. For Catalogues, Courses of Study, or other information, apply to

Trigonometry, Plain and Spherical.....*Robinson.*
Zoology.....*Agassiz and Gould.*

THIRD TERM.

Tacitus.....*Tyler.*
Prometheus, Aeschylus.....*Woolsey.*
Mensuration and Navigation.....*Robinson.*
Leveling and Surveying.....*Robinson.*
Classical Dictionary (for reference).....*Anthon.*

JUNIOR CLASS.

FIRST TERM.

Philippics, Demosthenes.
Analytical Geometry.....*Robinson.*
Chemistry.....*Youman.*
Astronomy, Descriptive.....*Burritt.*
German or French (elective).

SECOND TERM.

Gorgias, Plato.
Calculus, Differential and Integral.....*Robinson.*
Political Economy.....*Wayland.*
German or French.

THIRD TERM.

Philosophy, Mechanics.....*Jackson.*
Political Manual.....*Mansfield.*
Botany.....*Gray.*
Greek Testament. Weekly Recitations.
German or French.

Lectures during the year on Mechanics, Hydrostatics, Pneumatics, Acoustics, Optics, Electricity, Magnetism and Electro Magnetism.

SENIOR CLASS.

FIRST TERM.

Astronomy, Mathematical.....*Robinson.*
Intellectual Philosophy.....*Haven.*
Mineralogy.....*Dana.*
Laws of Nations.....*Vattel.*

SECOND TERM.

Geology.....*Dana.*
Logic.....*Bowen.*
History of Philosophy.....*Henry.*
Psychology.....*Cousin.*

THIRD TERM.

Cicero de Natura Deorum.
Geology.....*Dana.*
Rhetoric.....*Whately.*
Moral Science.....*Wayland.*

Lectures during the year on Astronomy, Geology, The Philosophy of History, the History of Philosophy and Classical Literature.

CALENDAR FOR 1865-66.

Fall Term—Begins Tuesday, September 12th; ends Thursday, December 21st.

Winter Term—Begins Tuesday, Jan. 2d; ends Thursday, March 22d.

Spring Term—Begins Tuesday, April 3d; ends Thursday, June 28th.

GENERAL INFORMATION.

EXPENSES.

MODEL SCHOOL—Primary, 50 cents per week.
" " Higher, 62½ cents per weeek.

PREPARATORY AND COLLEGIATE.

FOR FALL TERM OF FIFTEEN WEEKS:—

Tuition in English Preparatory Department	$7.50
" in Classical, Preparatory, and Collegiate Departments	10.00
Contingent Fee	2.00

FOR WINTER TERM OF TWELVE WEEKS:—

Tuition in English Preparatory Department,	6.00
" in Classical, Preparatory, and Collegiate Departments,	$8.25
Contingent Fee	1.00

FOR SUMMER TERM OF THIRTEEN WEEKS:

Tuition in English Preparatory Department	$6.50
" in Classical, Preparatory and Collegiate Departments	8.75
Contingent Fee	1.00
Extra—Vocal Music, per term,	$2.00

NO DEDUCTIONS will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from the time of entrance. *Tuition required in advance invariably.*

LOCATION.

The Illinois Wesleyan University is located in the city of Bloomington, McLean County, Illinois, in a healthful and delightful region of country, near the geographical center of the state, and at the intersection of the two great leading thoroughfares of travel; viz., the "Illinois Central" and the "St. Louis, Alton & Chicago" railroads. It is thus rendered easy of access at all times from all parts of our extended commonwealth. Our inland position, the enterprise and intel-

ligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instruction imparted within its halls.

LIBRARY.

The nucleus of a valuable Miscellaneous and Scientific Library has been secured for the use of the Institution.

APPARATUS.

Considerable additions during the year have been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing. It now comprises over four thousand specimens in Geology and Palæontology; one thousand one hundred Marine, and one thousand Fresh Water and Land Shells. A valuable Botanical collection representing nearly the entire Flora of the state, donated by Dr. George Vasey, which he generously proposes to complete. Some two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder. Various specimens in Mammology and Herpetology. A valuable Entomological collection prepared and presented by Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute at Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate; they will also be required to attend the regular daily worship in the College Chapel. A voluntary prayer-meeting has been organized which is well sustained, and has in connection with the religious efforts in the churches, resulted under the blessing of God, in the conversion during the last year of some thirty or more of our pupils.

LECTURES.

Regular Courses of Lectures will be delivered in connection with the recitations in the departments of Natural Science and of Mental and Moral Philosophy. Sabbath Lectures suited to the time and place are delivered in the afternoon of each Sabbath in the College Chapel, which have been of decided profit and interest.

QUARTERLY REPORTS.

Daily Records of the proficiency and deportment of every Student will be kept, and will, if desired, be furnished quarterly to his parents or guardians. At the close of the term on the occasion of the public examinations, the average standing of each Student for the whole term will be read, and placed on the records of the college for public inspection.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination; and no Student will be advanced whose average standing falls below the minimum established by the faculty.

TEXT BOOKS.

All the Text Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth.

☞ The curriculum in the Scientific department has been rearranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course. ☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable. It can be completed in four years, and will entitle the successful candidate to the degree of Bachelor of Science.

The Classical Course, it will be observed, is full and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the Student to the degree of Bachelor of Arts.

As the institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University; viz., that our Students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired, all are motives for the Student to take a little more time, make an increased effort and bear away from his Alma Mater its highest honors.

VOCAL MUSIC.

At the earnest and repeated solicitations of many of the Friends and Students of the University, a Department of Vocal Music has been organized, and will, henceforth, constitute a regular Department of the University. Special inducements also are held out to those who may desire a thorough course of instruction in vocal and instrumental music by the Northwestern Academy of Music located here.

COMPOSITION AND ELOCUTION.

The system of elocution adopted and taught by Russell, Murdock and Kidd, with charts and books with special directions for the practice of healthful, natural and fluent speaking has been introduced the last year, and promises valuable results in breaking up habits so often acquired and so seldom corrected, that unfit persons for eminence in this very desirable department of education. In connection with selected readings and declamations from the best authors, original compositions will be regularly required of the Student.

PREPARATORY DEPARTMENT.

This will be under the immediate supervision of a Principal, having charge of the Students during study hours while in the college building. It will be his duty to give special attention to the studies of those who may be taking a partial or irregular course, as well as to superintend the advancement of pupils from the Model School, in conjunction with the faculty. This has been deemed a great desideratum in the management of the University, and we feel that great advantages will accrue to a large class of our pupils by having the Preparatory Department thoroughly and systematically organized under the special care of a principal.

THE MODEL SCHOOL.

This department has been limited heretofore to a small number, from the fact that there was but one room and one teacher to whom they could be assigned. Arrangements are now being made to secure two additional rooms of sufficient size, neat and well furnished with the modern style of desks, so as to accommodate two teachers and eighty students. The increase of students demands this enlargement.

LITERARY SOCIETIES.

The Belle Lettres Literary Society has a convenient hall, and by public exhibitions as well as by its ordinary exercises has manifested the zeal, enterprise and improvement of its members.

A second association—the Munsellian—has also been organized by a number of spirited young men, and has entered the field of Literary effort with much promise for the future. We cannot speak too strongly of the advantages of such societies as an integral element of a thorough education.

BOARDING.

Good Boarding can be obtained in respectable private families in the city, at prices ranging from $3.00 to $4.00 per week, with fuel, lights, and rooms furnished.

SELF-BOARDING.

A large proportion of our young men preferring to be independent of their friends as far as possible in regard to support while prosecuting their stu lies; and others who could not otherwise acquire an education for lack of means, have boarded themselves on less than $1.25 per week. This is most praiseworthy in any young man; and we find that the self-denial, economy and industry thus called forth, are the assurance and foundation of future eminence, scholarship and usefulness.

THE COLLEGE EDIFICE.

This is beautifully located in the northern part of the city in a campus of ten acres adorned with young trees and shrubbery that render it each year more beautiful and pleasant. Improvements and additions will be made the present season to increase the room, neatness and facilities of the buildings already capable of accommodating a large number of Students.

GOVERNMENT.

The laws of this institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath-day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing firearms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars shall be suffered to remain to exert on others his corrupting influence.

COLLEGE COURSE.*

PROGRAMME OF DAILY RECITATIONS FOR THE YEAR 1866-7.

CLASS.	TIME.	1st TERM BEGINNING SEPT. 11th.	2nd TERM BEGINNING JAN. 2nd.	3rd TERM BEGINNING APRIL 2nd.
Freshman.	9.00	Algebra—Quadratics.	Geometry—Plane.	Homer.
	10.00	Chemistry.	Virgil.	Political Economy.
	11.00	Rhetoric.—Quackenbos.	Botany.	Algebra—completed.
	12 30	Cyropædia.	Memorabilia.	Botany.
	1.30	Cicero.	Physical Geography.	
Sophomore.	9 00	Physiology.	Tacitus.	Natural History,
	10.00	Livy.	Zoology.	Surveying.
	11.00	Des. Astronomy.	Trigonometry.	Prometheus.
	12.30	Geometry.—Solid.	Political Manual.	Rhetoric.
	1.30		Herodotus.	
Junior.	9.00	Horace.—Epistles.	German.	Cicero.
	10 00	Law of Nations.	Logic.	Demosthenes.
	11.00	German.	Horace.—Odes.	Chemistry.
	12.30	Natural Philosophy.	Chemistry.	Analytical Geometry.
	1.30			German.
Senior.	9.00	Gorgias.	Geology.	Astronomy.
	10.00	Calculus.	Mechanics.	Geology.
	11.00	Mineralogy.	Moral Science.	History of Philosophy.
	12.30	Mental Philosophy.		
	1.30			

*Preparatory or *Academic* Studies we find it impracticable, at present, to publish, in the form of a Programme of daily Recitation.

GENERAL INFORMATION.

EXPENSES.

MODEL SCHOOL—Primary, 50 cents per week.
" " Higher, 62½ cents per week.

PREPARATORY AND COLLEGIATE.

FOR FALL TERM :—

Tuition in English Preparatory Department	$7 50
" in Classical—Preparatory, and Collegiate Departments	10 00
Contingent Fee	2 00

FOR WINTER TERM :—

Tuition in English Preparatory Department	$6 25
" in Classical—Preparatory, and Collegiate Departments	8 50
Contingent Fee	2 00

FOR SUMMER TERM :—

Tuition in English Preparatory Department	$6 25
" in Classical—Preparatory, and Collegiate Departments	8 50
Contingent Fee	1 00

NO DEDUCTIONS will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from the time of entrance. *Tuition required in advance invariably.*

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing City of Bloomington, having already a population of over 12,000,—at the junction of the "Illinois Central" and the "Chicago, Alton & St. Louis" Railroads—being the centre of the Railroad system of the State—in a healthful and delightful region of country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts of the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us,

and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instruction imparted within its halls.

LIBRARY.

The nucleus of a valuable Miscellaneous and Scientific Library has been secured for the use of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing. It now comprises over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; some two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens in Mammology and Herpetology; a valuable Entomological collection prepared and presented by Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute at Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel. A voluntary prayer-meeting has been organized which is well sustained, and has, in connection with the religious efforts in the churches, resulted under the blessing of God, in the conversion, during the last year, of thirty or more of our pupils.

LECTURES.

Regular courses of Lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, and of Mental and Moral Philosophy. Sabbath Lectures, suited to the time and place, are delivered in the afternoon of each Sabbath in the College Chapel, which have been of decided profit and interest.

QUARTERLY REPORTS.

Daily Records of the proficiency and deportment of every Student will be kept, and at the close of the term on the occasion of the public examinations, the average standing of each Student for the whole term will be read, and placed on the records of the College for public inspection, and furnished to parents or guardians, if desired.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No Student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to young men desiring an educatio n. *Four Courses of Study*—two Classical and two Scientific:

I—*The Regular Classical Course.*

II—*A Classical Course*, in which the Student may elect certain *Sciences*, in place of the last two Terms of Latin and Greek respectively;—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A. B.)

III—*The Scientific Course*, including German.

IV—*A Scientific Course*, in which the Student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities for the practical study of Natural Sciences—our course of study in that Department being more *extensive* and more *thorough* than that of any similar institution in the State.

☞The curriculum in the Scientific department has been re-arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course ☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years.

The Classical course, it will be observed, is thorough and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the Student to the degree of Bachelor of Arts.

As the Institution grows older, we are gradually approximating the desirable end primarily set forth in the charac-

ter of a University, viz: that our Students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the Student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years standing, who in the interval has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

COLLEGE HONORS.

For the present, it is decided that the Valedictory shall be a Classical honor, and the Salutatory a Scientific honor.

VOCAL MUSIC.

Regular instruction in vocal music will be furnished to such as desire it, free of expense. Special inducements are also held out to those who may desire a thorough course of instruction in vocal and instrumental music, by the Northwestern Academy of Music, located in this city.

COMPOSITION AND ELOCUTION.

Regular weekly exercises in English composition and declamation, are required of *all* the Students of the Institution. Original declamations are required of the *Junior and Senior Classes.*

PREPARATORY DEPARTMENT.

This will be under the immediate supervision of Prof. Goodwin, who will have charge of the Students during study hours while in the College building. It will be his duty to give special attention to the studies of those who may be taking a partial or irregular course, as well as to superintend the advancement of Students from the Model School, in conjunction with the Faculty. This has been deemed a great desideratum in the management of the University, and we feel that great advantages will accrue to a

large class of our pupils, by having the Preparatory Department thoroughly and systematically organized under the special care of a principal.

THE MODEL SCHOOL.

This is a graded school, in a separate building, with rooms of ample size, neat and well furnished, with desks of modern style, so as to accommodate eighty pupils. This school has two Departments—*Primary* and *Higher*—both under the charge of a competent Principal, assisted by tutors. By employing the best *modern methods* of teaching, it is our purpose to make this a Model School *in fact* as well as *in name*.

LITERARY SOCIETIES.

The "Belle Lettres Literary Society," has a convenient hall, and, by public exhibitions as well as by its ordinary exercises, has manifested the zeal, enterprise and improvement of its members.

A second association—the "Munsellian"—has entered the field of Literary effort with much promise for the future.

Both these Societies, during the last year, have expended considerable money in furnishing and ornamenting their respective session rooms.

We can scarcely speak too strongly of the advantages of such Societies, as an integral element of a thorough education.

BOARDING.

Good boarding can be obtained in respectable private families in the city, at prices ranging from $3.50 to $4.50 per week, with fuel, lights, and rooms furnished.

SELF-BOARDING.

A large proportion of our young men preferring to be independent of their friends, as far as possible, in regard to support while prosecuting their studies, and others who could not otherwise acquire an education, for lack of means, have boarded themselves on $1.25 per week. This is most praiseworthy in any young man; and we find that the self-denial, economy and industry thus called forth, are the assurance and foundation of scholarship, usefulness, and future eminence.

THE COLLEGE EDIFICE.

This is beautifully located in the northern part of the city, in a campus of ten acres, adorned with young trees and shrubbery that render it each year more beautiful and pleasant. The College campus has recently been greatly improved and decorated with valuable evergreens, through the liberal donations made for this purpose by JUDGE BROWN, of Jacksonville, REV. C. W. C. MUNSELL, and F. K. PHOENIX, ESQ., of Bloomington.

Improvements and additions have recently been made to increase the room, neatness and facilities of the buildings, which are now capable of accommodating a large number of students.

ENDOWMENT, &C.

One Hundred Thousand Dollars are promised this year as an addition to our present Endowment Fund. Already a large portion of this amount has been realized through the munificent centenary offerings of the two patronizing Conferences. The *Illinois Wesleyan University* is now established upon a firm and permanent financial basis—thus furnishing a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their name and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors of the University. Large amounts are still needed to furnish such Endowment, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our country. Donations for founding *Professorships*, *Free Scholarships*, *Prizes*, *etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

A chair of Agricultural Science has lately been endowed by the family of the late HON. ISAAC FUNK—to be called the "*Isaac Funk Professorship of Agriculture.*"

A chair, the name of which is not yet fixed, has been endowed, during the last year, by the liberal donations of

Messrs. J. E. McClun, John Magoun, C. W. Holder, and C. W. C. Munsell—all of the "Home Bank," Bloomington.

The generous action of our friends at Springfield, Decatur, Danville, etc., renders it nearly certain that two other chairs will be immediately endowed—to be named in honor of the late Revs. Jonathan Stamper and Isaac C. Kimber.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing firearms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars, shall be suffered to remain to exert on others his corrupting influence.

CALENDAR FOR 1866-7.

Fall Term Begins—Tuesday, September 11th; ends Thursday, Dec. 20th.

Winter Term Begins—Wednesday, January 2d; ends Thursday, March 21st.

Spring Term Begins—Tuesday, April 2d; ends Thursday, June 20th.

GENERAL INFORMATION.

EXPENSES.

PREPARATORY AND COLLEGIATE.

FOR FALL TERM :—

Tuition in English Preparatory Department - -	$7 50
" in Classical—Preparatory, and Collegiate Departments - - - - -	10 00
Contingent Fee - -	2 00

FOR WINTER TERM :—

Tuition in English Preparatory Department - -	$6 00
" in Classical—Preparatory, and Collegiate Departments - - - - - -	8 50
Contingent Fee - - -	2 00

FOR SUMMER TERM :—

Tuition in English Preparatory Department - -	$6 00
" in Classical—Preparatory, and Collegiate Departments - - - - - -	8 50
Contingent Fee - - -	1 00

NO DEDUCTIONS will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from the time of entrance. *Tuition required in advance, invariably.*

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing City of Bloomington, having already a population of nearly 15,000,—at the junction of the "Illinois Central" and the "Chicago, Alton and St. Louis" Railroads—being the centre of the Railroad system of the State—in a healthful and delightful region of country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the Institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing. It now comprises over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; some two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens in Mammology and Herpetology; a valuable Entomological collection prepared and presented by Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all secretarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "CHRISTIAN SOCIETY OF INQUIRY" has sustained a regular weekly prayer-meeting, which has been well attended, and, in connection with the religious efforts of the Churches, has resulted, under the blessing of God, in the conversion of a considerable number of our Students.

LECTURES.

Regular courses of Lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, and of Mental and Moral Philosophy. Sabbath Lectures, suited to the time and place, are delivered in the afternoon of each Sabbath in the College Chapel, which have been of decided profit and interest.

QUARTERLY REPORTS.

Daily records of the proficiency and deportment of every Student will be kept, and at the close of the term on the occasion of the public examinations, the average standing of each Student for the whole term will be read, and placed on the records of the College for public inspection, and furnished to parents or guardians, if desired.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No Student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to young men desiring an education, *Four Courses of Study*—two Classical and two Scientific;

I—*The Regular Classical Course.*

II—*A Classical Course*, in which the Student may elect certain *Sciences*, in place of the last two Terms of Latin and Greek respectively;—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A. B.)

III—*The Scientific Course*, including German.

IV—*A Scientific Course*, in which the Student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities for the practical Study of Natural Sciences—our course of study in that Department being more *extensive* and more *thorough* than that of any similar institution in the State.

☞The curriculum in the Scientific department has been re-arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years.

The Classical course, it will be observed, is thorough and complete, comparing favorably with that of our older Universities It includes a course of four years, in addition to the usual Preparatory studies, and entitles the Student to the degree of Bachelor of Arts.

As the Institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz: that our Students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the Student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing, who in the interval has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

COMPOSITION AND ELOCUTION.

Regular weekly exercises in English composition and declamation, are required of *all* the Students of the Institution Original declamations are required of the *Junior and Senior Classes.*

PREPARATORY DEPARTMENT.

This will be under the immediate supervision of the Professor of English Language and Literature, who will have charge of the Students during study hours while in the College Building It will be his duty to give special attention to the studies of those who may be taking a partial or irregular course, as well as to superintend the advancement of Students preparing for regular course of study.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies, have each convenient Halls, neatly fitted up and furnished; and are prosecuting their labors in their own peculiar field of College life and labor, with much energy and success. They have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions either in books or money will be gratefully received and wisely applied.

RHETORICAL PRIZES.

During Commencement Week, two *prizes* will be awarded; one for the best declamation, and the other for the best original essay. Each College class (except the *Senior*) will be entitled to two contestants. The Conference Visitors will constitute the Board of Judges

BOARDING.

Good boarding can be obtained in respectable private families in the city, at prices ranging from $3.50 to $4.50 per week, with fuel, lights and rooms furnished.

SELF-BOARDING.

A considerable number of our young men preferring to be independent of their friends, as far as possible, in regard to support while prosecuting their studies, and others who could not otherwise acquire an education, for lack of means, have boarded themselves on $1.25 per week. This is most praiseworthy in any young man; and we find that the self-denial, economy and industry thus called forth, are the assurance and foundation of scholarship, usefulness, and future eminence.

COLLEGE EDIFICE.

This is beautifully located in the Northern part of the City, in a beautiful campas of ten acres of ground, adorned with young forest and ornamental trees; directly on the line of the new Bloomington & Normal Street Rail Road, whose cars will be running regularly within ninety days, thus rendering it easy of access from every part of the two cities. The Building is plain but comfortable and convenient, and affords ample facilities for the accommodation of Two Hundred and Fifty Students.

ENDOWMENT, &c.

The permanent funds of the Institution, including Funded Endowments, Bonds and other Securities, Lands, Grounds, Buildings, Museums, Apparatus, &c., &c., may now be safely estimated at not less than $120,000.00, unincumbered by debts or liabilities of any kind.

The *Illinois Wesleyan University* is therefore, now established upon a firm and permanent financial basis—thus furnishing a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their name and benificence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors of the University. Large amounts are still needed to furnish such Endowment, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our country. Donations for founding *Professorships*, *Free Scholarships*, *Prizes*, *etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

GOVERNMEMT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual habits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpremitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing firearms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars, shall be suffered to remain to exert on others his corrupting influence.

PROGRAMME OF DAILY RECITATIONS FOR THE COLLEGIATE YEAR 1868–9.

CLASS.	TIME.	1st Term—Beginning Sept. 15.	2d Term—Beginning Jan. 5.	3d Term—Beginning March 30.
PREPARATORY.	8.00 9.00 10.00 11.00 12.30	General Exercises. Orthography—1st year Latin, Greek, Analysis. 2d year Latin, History, Geography. Arithmetic, Mental & Practical.	General Exercises. Etymology—1st year Latin, Greek, Analysis. 2d year Latin, Natural Philosophy, Geography. Algebra, Elements. Arithmetic.	General Exercises. Syntax—1st year Latin, Greek, English Composition. 2d year Latin, Greek, Natural Philosophy, Physical Geog. Algebra, Higher Arithmetic
FRESHMAN.	9.00 10.00 11.00 12.30	Chemistry. Rhetoric. Cyropædia—Cicero. Algebra.—Quadratics.	Botany. Memorabilia—Virgil. Rhetoric. Geometry—Plane.	Botany. Political Economy. Homer. Algebra Completed.
SOPHOMORE.	9.00 10.00 11.00 12.30	Geometry—Solid. Astronomy—Descriptive. Physiology. Livy.	Trigonometry Political Manual—Tacitus. Herodotus Zoology.	Surveying. Evidences of Christianity—Horace. Natural History. Gorgias.
JUNIOR.	9.00 10.00 11.00 12.30	German. Horace—Odes. Analytical Geometry. Mechanics.	German. Calculus. Molecular Physics. Demosthenes.	German. Prometheus. Astronomy. Chemistry.
SENIOR.	9.00 10.00 11.00 12.30	Cicero de Nat. Deo. Mineralogy. Law of Nations, Mental Philosophy.	Geology. Rhetoric. History of Philosophy.	Geology. Logic. Moral Science.

GENERAL INFORMATION.

EXPENSES.

PREPARATORY AND COLLEGIATE.

For Fall Term:—

Tuition in English Preparatory Department, - $10 00
" in Classical—Preparatory and Collegiate Departments, - - - - 12 00

For Winter Term:—

Tuition in English Preparatory Department, - $8 00
" in Classical—Preparatory and Collegiate Departments, - - - - 10 00

For Summer Term:—

Tuition in English Preparatory Department, - $8 00
" in Classical—Preparatory and Collegiate Departments, - - - - 10 00

No Deductions will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from the time of entrance. *Tuition required in advance, invariably.*

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing City of Bloomington, having already a population of nearly 18,000, at the junction of the "Illinois Central" and the "Chicago, Alton and St. Louis" Railroads—being the center of the Railroad system of the State—in a healthful and delightful region of country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us,

and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the institution, in conjunction with the Board of Trustees, thus offering to the public strong guaranties of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing. It now comprises over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; about two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens in Mammology and Herpetology; a valuable Entomological collection prepared and presented by Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students, will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "CHRISTIAN SOCIETY OF INQUIRY" has sustained a regular weekly prayer-meeting, which has been well attended, and, in connection with the religious efforts of the Churches, has resulted, under the blessing of God, in the conversion of thirty of our Students.

LECTURES.

Regular courses of Lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, and of Mental and Moral Philosophy. Sabbath Lectures, suited to the time and place, are delivered in the afternoon of each Sabbath in the College Chapel, which have been of decided profit and interest.

QUARTERLY REPORTS.

Daily records of the proficiency and deportment of every Student will be kept, and at the close of the term on the occasion of the public examinations, the average standing of each Student for the whole term will be read, and placed on the records of the College for public inspection, and furnished to parents or guardians, if desired.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No Student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to young men desiring an education, *Four Courses of Study*—two Classical and two Scientific:

I.—*The Regular Classical Course.*

II.—*A Classical Course*, in whice the Student may elect certain *Sciences*, in place of the last two Terms of Latin and Greek respectively:—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A. B.)

III.—*The Scientific Course*, including German.

IV.—*A Scientific Course*, in which the Student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities for the practical Study of Natural Sciences—our course of study in that Department being more *extensive* and more *thorough* than that of any similar institution in the State.

☞The curriculum in the Scientific department has been re-arranged with special reference to the wants of the large class of young men whose time means, or other circumstances do not admit of their pursuing the regular Collegiate Course.☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years

The Classical course, it will be observed, is thorough and complete, comparing favorably with that of our older Uni-

versities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the Student to the degree of Bachelor of Arts.

As the Institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz; that our Students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the Student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing who in the interval has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

COMPOSITION AND ELOCUTION.

Regular exercises in English composition and declamation are required of *all* the students of the institution Valuable prizes are offered to those excelling in these departments. Attention is called to the special facilities in the department of Elocution. A Professor of Elocution of large experience and eminent success has been fortunately secured, who will devote his entire attention to this much neglected department.

PREPARATORY DEPARTMENT.

The Preparatory Department, designed primarily to fit students for the College proper, is at the same time a well regulated Academic Institution, offering all the advantages of a first-class Academy or Seminary, to those who wish a more thorough culture in the common English branches, than can usually be obtained in our country district schools.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies have each convenient Halls, neatly fitted up and furnished, and are prosecuting their labors in their own peculiar field of College life and labor, with much energy and success. They have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions, either in books or money, will be gratefully received and wisely applied.

RHETORICAL PRIZES.

During Commencement Week three prizes will be awarded: One to the Freshman Class, for the best Declamation; one to the Sophomore Class, for the best Essay, and one to the Junior Class, for the best Original Oration. Each class will be entitled to three contestants. The Conference Visitors will constitute the Board of Judges.

ENDOWMENT, &c.

The permanent funds of the Institution, including Funded Endowments, Bonds and other Securities, Lands, Grounds, Buildings, Museums, Apparatus, &c., &c., may now be safely estimated at not less than $153,000.00, unincumbered by debts or liabilities of any kind.

SPECIAL ITEMS.

COLLEGE EDIFICE.

This is beautifully located in the Northern part of the City, in a beautiful campus of ten acres of ground, adorned with young forest and ornamental trees, directly on the line of the Bloomington and Normal Street Railroad, thus rendering it easy of access from every part of the two cities The present Building is comfortable and convenient, affording ample facilities for the accommodation of Two Hundred and Fifty Students.

A second University Building—a model of taste and beauty—of imposing dimensions, (70 by 140 feet, five stories in height,) is soon to be erected. The foundations have been already laid, and the work will be energetically prosecuted until the building is completed and occupied. It is confidently believed that this will be second to no similar building in the State, in architectural beauty and internal convenience.

BOARDING.

Good Boarding can be obtained in respectable private families, in the city, at prices ranging from $4.00 to $5.00 per week. Students board themselves, satisfactorily, in rented rooms, at $2.00 per week.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every Student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other

breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars, will be suffered to remain to exert on others his corrupting influence: but justice to our young men demands that we should note the fact that such is the 'esprit du corps' and high moral sentiment which prevail among them, that written laws are practically superfluous; since they will not tolerate the degrading and immoral practices which have sometimes brought disgrace upon our best Colleges.

GENERAL REMARKS.

☞ The number of Students in the present Catalogue includes the attendance of Four Terms instead of Three, as it has been deemed advisable to change the time of publication from the close to the beginning of the College year.

☞ Model School; a comparison of the present with the last Annual Catalogue, will show an apparent decrease in numbers, owing to the abolition of the Model School for boys, when in fact there has been a decided increase in the Departments retained.

☞ It is with peculiar pleasure that the fact is noted here that the Illinois Wesleyan University by the complete organization of all the regular College Classes, the breadth and completeness of its Courses of Study, and the steadiness and firmness with which its Undergraduates are held to those Courses, in fact and not merely in name, has vindicated its right to the Collegiate title which it bears.

☞ The special attention of young men desiring to enter our College Classes is called to the regular Entrance Examinations at the beginning of the Fall Term.

☞ The *Illinois Wesleyan University* being now established upon a firm and permanent financial basis—furnishes a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their name and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large hearted patrons and benefactors: but large amounts are still needed to furnish such Endowments, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our country. Donations for founding *Professorships, Free Scholarships, Prizes, etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

CALENDAR FOR 1868-9.

Fall Term begins.....Tuesday, September 15
Examinations begin,.....Monday, December 21
Fall Term ends,.....Wednesday, December 23

WINTER VACATION.

Winter Term begins,.....Tuesday, January 5
Annual Exhibition of Munsellian Literary Society,.....Saturday, January 16
Examinations begin,.....Monday, March 22
Annual Exhibition of the Belles Lettres Society,.....Tuesday, March 23
Winter Term ends,.....Wednesday, March 24

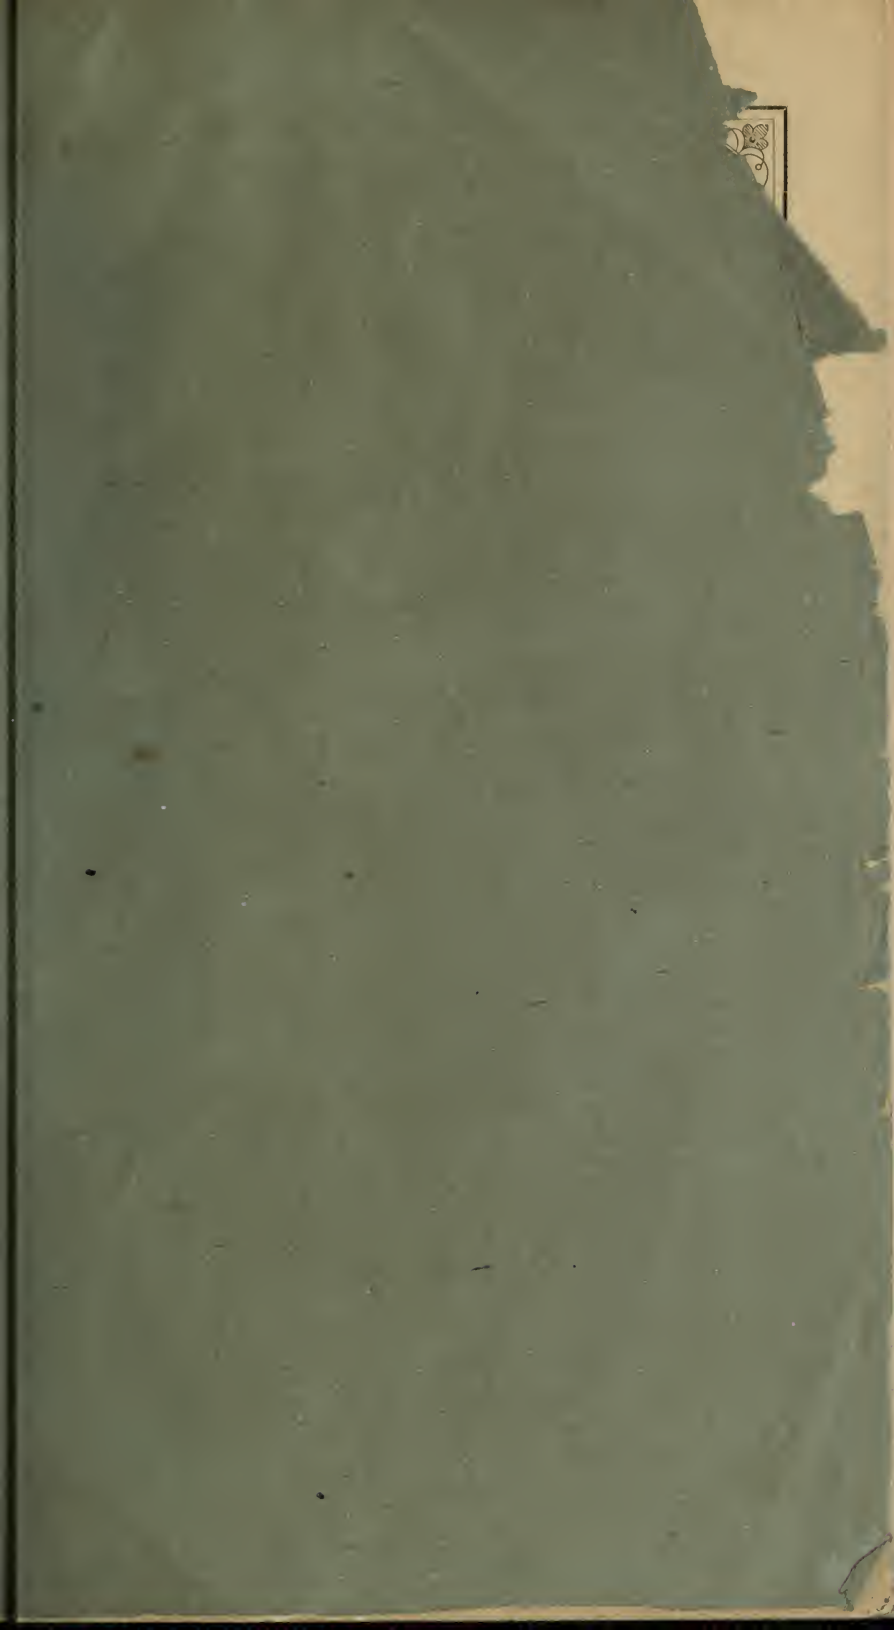

SPRING VACATION.

Spring Term begins,.....Tuesday, March 30
Baccalaureate Sermon,.....3:30 p. m., Sunday, June 20
Address before the Society of Christian Inquiry,.....8 p. m., Sunday, June 20
Examinations begin,.....Monday, June 21
Prize Declamations and Essays,.....8 p. m., Monday, June 21
Annual Meeting of the Joint Board of Trustees and
Visitors,.....2 p. m., Tuesday, June 22
Address before the Literary Societies,.....8 p. m., Tuesday, June 22
Alumni Address and Re-union,.....8 p. m., Wednesday, June 23
Commencement,.....10 a. m., Thursday, June 24

SUMMER VACATION.

Fall Term begins,.....Tuesday, September 14
Entrance Examination,.....9 a. m., Tuesday, September 14

	2	Mineralogy.	History of Philosophy.	Logic.
	3	Laws of Nations.		Moral Science.
	4	Mental Philosophy.	Rhetoric.	English Literature.

GENERAL INFORMATION.

EXPENSES.

PREPARATORY AND COLLEGIATE.

For Fall Term:—

Tuition in English Preparatory Department,.....$10 00
" in Classical Preparatory, and Collegiate Departments,..... 12 00

For Winter Term:—

Tuition in English Preparatory Department,..... 8 00
" in Classical Preparatory, and Collegiate Departments,..... 10 00

For Summer Term:—

Tuition in English Preparatory Department,..... 8 00
" in Classical Preparatory, and Collegiate Departments,..... 10 00

No Deductions will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from time of entrance, *Tuition required in advance, invariably.*

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing City of Bloomington, having already a population of nearly 18,000, at the junction of the "Illinois Central," the "Chicago, Alton and St. Louis," "Jacksonville and St. Louis" and "Bloomington and Pekin Railroads—being the center of the Railroad system of the State—in a healthful and delightful region of country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the institution, in conjunction with the Board of Trustees, thus offering to the public strong guarantees of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing—comprising over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection, representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; about two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens in Mammalogy and Herpetology; a valuable Entomological collection prepared and presented by Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "Christian Society of Inquiry" has sustained a regular weekly prayer-meeting, which has been well attended, and, in connection with the religious efforts of the Churches, has resulted, under the blessing of God, in the conversion of a number of our Students.

LECTURES.

Regular courses of Lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, and of Mental and Moral Philosophy. Sabbath Lectures, suited to the time and place, are delivered in the afternoon of each Sabbath, in the College Chapel, which have been of decided profit and interest.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No Student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text-Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to young men desiring an education, *Four Courses of Study*—two Classical and two Scientific.

I.—*The Regular Classical Course.*

II.—*A Classical Course*, in which the Student may elect certain *Sciences*, in place of the last two Terms of Latin and Greek respectively:—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A. B.)

III.—*The Scientific Course*, including German.

IV.—*A Scientific Course*, in which the Student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities offered for the practical Study of the Natural Sciences—our course of study in that Department being more *extensive* and more *thorough* than that of any similar institution in the State.

☞The curriculum in the Scientific department has been rearranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular Collegiate Course.☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years.

The Classical Course, it will be observed, is thorough and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the Student to the degree of Bachelor of Arts.

As the Institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz: that our Students should complete the classics. The experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the Student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing who, in the interval, has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

COMPOSITION AND ELOCUTION.

Regular exercises in English Composition and Declamation are required of *all* the students of the Institution. Valuable prizes are offered to those excelling in these departments. Attention is called to the special facilities in the department of Elocution. A Professor of Elocution of large experience and eminent success has been fortunately secured, who will devote his attention to this much neglected department.

PREPARATORY DEPARTMENT.

The Preparatory Department, designed primarily to fit students for the College proper, is at the same time a well regulated Academic Institution, offering all the advantages of a first-class Academy or Seminary, to those who wish a more thorough culture in the common English branches, than can usually be obtained in our country district schools.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies have each convenient Halls, neatly fitted up and furnished, and are prosecuting their labors in their own peculiar field of College life and labor, with much energy and success. They have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions, either in books or money, will be gratefully received and wisely applied.

RHETORICAL PRIZES.

During Commencement Week three prizes will be awarded:—One to the Freshman Class, for the best Declamation; one to the Sophomore Class, for the best Essay, and one to the Junior Class, for the best Original Oration. Each class will be entitled to two contestants. The Conference Visitors will constitute the Board of Judges.

ENDOWMENT, &c.

The permanent funds of the Institution, including Funded Endowments, Bonds and other Securities, Lands, Grounds, Buildings, Museums, Apparatus, &c., &c., may now be safely estimated at not less than $180,000.00, unincumbered by debts or liabilities of any kind.

COLLEGE EDIFICE.

This is beautifully located in the Northern part of the City, in a beautiful campus of ten acres of ground, adorned with young forest and ornamental trees, directly on the line of the Bloomington and Normal Street Railroad, thus rendering it easy of access from every part of the two cities. The present Building is comfortable and convenient, affording ample facilities for the accommodation of Two Hundred and Fifty Students.

A second University Building—a model of taste and beauty—of imposing dimensions, (70 by 140 feet, five stories in height,) has been commenced. The basement walls have been already laid, and the work will be energetically prosecuted until the building is completed and occupied. It is confidently believed that this will be second to no similar building in the State, in architectural beauty and internal convenience.

BOARDING.

Good Boarding can be obtained in respectable private families, in the city, at prices ranging from $4.00 to $5.00 per week. Students board themselves, satisfactorily, in rented rooms, at $2.00 per week.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No Student who occasions trouble in any of these particulars, will be suffered to remain to exert on others his corrupting influence; but justice to our young men demands that we should note the fact that such is the 'esprit du corps' and high moral sentiment which prevail among them, that written laws are practically superfluous; since they will not tolerate the degrading and immoral practices which have sometimes brought disgrace upon our best Colleges.

GENERAL REMARKS.

☞The number of Students in the present Catalogue includes the attendance of Four Terms instead of Three, as it has been deemed advisable to change the time of publication from the close to the beginning of the College Year.

☞It is with peculiar pleasure that the fact is noted here that the Illinois Wesleyan University, by the complete organization of all the regular College Classes, the breadth and completeness of its Courses of Study, and the steadiness and firmness with which its Undergraduates are held to those Courses, in fact and not merely in name, has vindicated its right to the Collegiate title which it bears.

☞The special attention of young men desiring to enter our College Classes is called to the regular Entrance Examinations at the beginning of the Fall Term.

☞The *Illinois Wesleyan University* being now established upon a firm and permanent financial basis, furnishes a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their name and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors; but large amounts are still needed to furnish such Endowments, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our Country. Donations for founding *Professorships*, *Free Scholarships*, *Prizes*, *etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

CALENDAR FOR 1869-70.

COURSES OF STUDY.

SCIENTIFIC AND CLASSICAL.

FIRST YEAR.—PREPARATORY.

[SCIENTIFIC AND CLASSICAL.]

FIRST TERM.

English Grammar—Orthography, ... *Greene*
Geography, ... *Mitchell*
Arithmetic, ... *Robinson*
English Exercises.

SECOND TERM.

English Grammar—Etymology, ... *Greene*
Geography, ... *Mitchell*
Arithmetic, ... *Robinson*
English Exercises.

THIRD TERM.

English Grammar—Syntax, ... *Greene*
Georgraphy, reviewed, ... *Mitchell*
Arithmetic, ... *Robinson*
English Exercises.

SECOND YEAR PREPARATORY.

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
English Analysis,	*Greene*	English Analysis,	*Greene*
Natural Philosophy,	*Quackenbos*	Natural Philosophy,	*Quackenbos*
Mental Arithmetic,	*Robinson*	Latin Grammar,	*Harkness*

English Exercises.

SECOND TERM.

English Composition,		English Composition,	
Physical Geography,	*Mitchell*	Physical Geography,	*Mitchell*
Algebra—Elements,	*Robinson*	Latin Reader,	*Harkness*

English Exercises.

THIRD TERM.

Chemistry, . .	*Steele*	Chemistry, . .	*Steele*
History of United States,	*Anderson*	History of United States,	*Anderson*
Algebra, . .	*Robinson*	Latin Reader,	*Harkness*

English Exercises.

THIRD YEAR PREPARATORY.

CLASSICAL.

: o :

FIRST TERM.

Latin, ... *Hanson's Prose Book*
Greek, ... *Hadley's Grammar*
Mental Arithmetic, ... *Robinson*
Declamation and Composition.

SECOND TERM.

Latin, ... *Hanson's Prose Book*
Greek, ... *Whiton's Exercises*
Algebra, ... *Robinson*
Declamation and Composition.

THIRD TERM.

Latin, ... *Hanson's Prose Book*
Greek, ... *Whiton's Exercises*
Algebra, ... *Robinson*
Declamation and Composition.

COLLEGIATE.

FRESHMAN YEAR.

—:o:—

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
Algebra,	*Robinson*	Algebra,	*Robinson*
Civil Government,	*Townsend*	Cicero de Senectute et Amicitia	*Anthon*
Latin Grammar, (or English Language,)	*Harkness*	Xenophon's Anabasis, or Cyropædia,	*Boise*
Lectures on Civil Government.		Lectures on Roman History.	

Declamation and Composition.

SECOND TERM.

Geometry,	*Greenleaf*	Geometry,	*Greenleaf*
Botany,	*Gray*	Æneid of Virgil,	*Anthon*
Latin Reader, (or Rhetoric,)	*Harkness*	Xenophon's Memorabilia of Socrates.	
Lectures on Botany.		Lectures on Grecian History and Comparative Phonology.	

Declamation and Composition.

THIRD TERM.

Algebra, completed,	*Robinson*	Algebra, completed,	*Robinson*
Botany,	*Gray*	Livy,	*Zumpt*
Latin Reader, (or Rhetoric,)	*Harkness*	Homer's Iliad,	*Anthon*
Lectures on English Language.		Lectures on Classic Mythology	

Declamation and Composition.

SOPHOMORE YEAR.

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
Geometry—Solid,	*Greenleaf*	Geometry—Solid,	*Greenleaf*
Latin,	*Hanson's Prose*	Tacitus—Germania et Agricola,	*Anthon*
(or Astronomy,)			
Physiology,	*Draper*	Physiology,	*Draper*
Lectures on Cellular Histology.		Lectures—Latin Language and Literature.	

Elocution—Orthoepy and Vocal Culture.

SECOND TERM.

Trigonometry,	*Robinson*	Trigonometry,	*Robinson*
Latin,	*Hanson's Prose*	Horace—Epistles,	*Anthon*
(or Natural Theology,)			
Zoology	*Agassiz*	Gorgias of Plato,	*Woolsey*
Lectures—Vertebrate Skeleton.		Lectures—Greek Literature.	

Elocution—Vocal Culture, Gesture, Reading and Speaking.

THIRD TERM.

Analytics,	*Johnson*	Analytics,	*Johnson*
General History,	*Anderson*	General History,	*Anderson*
Latin,	*Hanson's Prose*	Horace—Odes,	*Anthon*
(or Natural History,)			

Lectures on History of Mathematics.

Lectures on Insects Injurious to Vegetation.

Elocution—

Exercises on the Style of Utterance appropriate for Reading or Speaking the Various Forms of Thought and Feeling;

Lectures on the Rise, Progress and Avantages of Oratory.

JUNIOR YEAR.

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
Mechanics,	*Silliman*	Mechanics,	*Silliman*
Cicero de Senctute et Amicitia, (or Calculus,)		Cicero de Natura Deorum,	
		Demosthenes de Corona,	*Champlin*
German,	*Woodbury*		
Evidences of Christianity,	*Hopkins*	Evidences of Christianity,	*Hopkins*

Lectures on Science of Language.

Rhetorical Exercises.

SECOND TERM.

Molecular Physics,	*Silliman*	Molecular Physics,	*Silliman*
Political Economy,	*Wayland*	Political Economy,	*Wayland*
German,	*Woodbury*	Botany,	*Gray*

Lectures on Political Economy.

Rhetorical Exercises.

THIRD TERM.

Chemistry,	*Youman*	Chemistry,	*Youman*
Astronomy,	*Robinson*	Astronomy,	*Robinson*
German,	*Woodbury*	Prometheus of Æschylus,	*Woolsey*
Surveying, (Optional,)	*Robinson*	Surveying, (Optional,)	*Robinson*

Lectures on Astronomy.

Lectures on Agricultural Chemistry.

Rhetorical Exercises.

SENIOR YEAR.

SCIENTIFIC AND CLASSICAL

FIRST TERM.

Mineralogy, ... *Dana*
Law of Nations, ... *Vattel*
Mental Philosophy, ... *Haven*
Psychology, ... *Lectures*
Rhetorical Exercises.

SECOND TERM.

Geology, ... *Dana*
Rhetoric, ... *Whately*
Psychology, ... *Cousin*
History of Philosophy, ... *Lectures*
Rhetorical Exercises.

THIRD TERM.

English Literature, ... *Shaw*
Logic, ... *Schuyler*
Moral Science, ... *Wayland*
Geology, ... *Lectures*
Elocution—Dramatic Reading, Reading from Shakespeare and the Bible.

Programme of Daily Recitations for the Collegiate Year 1870--71.

CLASS.	HOUR.	1st TERM.	2d TERM.	3d TERM.
PREPARATY	1	Natural Phil.—Orthograpy—Greek.	Physical Geog—Etymology—Greek.	Syntax—2d year Latin.
	2	Geography—Analysis.	English Composition—Geography.	U. S. History—Geography—Greek.
	3	Mental Arithmetic—1st Year Latin.	Algebra—1st year Latin.	Algebra—1st year Latin—Arithmetic.
	4	Practical Arithmetic—2d Year Latin.	Arithmetic—2d year Latin.	Chemistry.
FRESHMAN.	1	Algebra.	Geometry.	Algebra.
	2	Civil Government—Cyropædia.	Botany.	Botany.
	3	English Language.	Rhetoric—Memorabilia.	Rhetoric—Homer.
	4	Cicero de Senectute.	Virgil.	Livy.
SOPHOMORE.	1	Geometry.	Horace—Epistles.	Zoology.
	2	Physiology.	Trignometry.	Analytics.
	3	Astronomy—Tacitus.	Comparative Anatomy.	Horace—Odes.
	4	Orthoepy and Vocal Culture.	Natural Theology, Gorgias of Plato.	General History.
	5		Vocal Culture, Gesture, &c.	Exercises on Styles of Utterance.
JUNIOR.	1	German—Cicero de Nat. Deo.	German.	German.
	2	Evidences of Christianity.	Botany.	Prometheus.
	3	Calculus—Demosthenes.	Political Economy.	Chemistry.
	4	Mechanics.	Molecular Physics.	Astronomy.
SENIOR.	1		Geology.	Dramatic Read'g, Shakespere & Bible.
	2	Mineralogy.	History of Philosophy.	Logic.
	3	Laws of Nations.		Moral Science.
	4	Mental Philosophy.	Rhetoric.	English Literature.

GENERAL INFORMATION

EXPENSES.

PREPARATORY AND COLLEGIATE.

FOR FALL TERM:—

Tuition in English Preparatory Department,.....$10 00
" in Classical Preparatory, and Collegiate Departments,..... 12 00

FOR WINTER TERM:—

Tuition in English Preparatory Department,..... 9 00
" in Classical Preparatory, and Collegiate, Departments,..... 10 50

FOR SUMMER TERM:—

Tuition in English Preparatory Department,..... 9 00
" in Classical Preparatory, and Collegiate Departments, ...10 50

NO DEDUCTIONS will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from time of entrance. *Tuition required in advance, invariably.*

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing city of Bloomington, having already a population of nearly 18,000, at the junction of the "Illinois Central," the "Chicago, Alton and St. Louis," "Jacksonville and St. Louis," "Indianapolis, Bloomington and Western," and the "Lafayette, Bloomington and Mississippi Railroads,—being the center of the Railroad system of the State—in a healthful and delightful region of the country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the institution, in conjunction with the Board of Trustees, thus offering to the public strong guarantees of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing—comprising over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection, representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; about two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens of Mammalogy and Herpetology; a valuable Entomological collection, prepared and presented by the late Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "CHRISTIAN SOCIETY OF INQUIRY" has sustained a regular weekly prayer-meeting, which has been well attended, and, in connection with the religious efforts of the Churches, has resulted, under the blessing of God, in the conversion of a number of our Students.

LECTURES.

Regular courses of lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, and of Mental and Moral Philosophy. Sabbath lectures, suited to the time and place, are delivered in the afternoon of each Sabbath, in the College Chapel, which have been of decided profit and interest.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No Student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text-Books used in the University can be obtained at reasonable rates in this city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to young men desiring an education, *Four courses of Study*—two Classical and two Scientific.

I.—*The Regular Classical Course.*

II.—*A Classical Course*, in which the Student may elect certain Sciences, in place of the last two Terms of Latin and Greek respectively:—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A.B.)

III.—*The Scientific Course*, including German.

IV.—*A Scientific Course*, in which the student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities offered for the practical study of the Natural Sciences—our course of study in that Department being more *extensive* and more *thorough* than that of any similar institution in the State.

☞The curriculum in the Scientific department has been re-arranged with special reference to the wants of the large class of young men whose time, means, or other circumstances do not admit of their pursuing the regular collegiate course.☜ It is designed to discipline the mind and prepare young men for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years.

The Classical Course, it will be observed, is thorough and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts.

As the institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz: that our Students should complete the classics, the experience of ages, the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the Student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing who, in the interval, has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before COMMENCEMENT. The usual fee for the Diploma is payable in advance.

COMPOSITION AND ELOCUTION.

Regular exercises in English Composition and Declamation are required of *all* the students of the Institution. Valuable prizes are offered to those excelling in these departments. Attention is called to the special facilities in the department of Elocution.

S. S. Hamill, A. M., a teacher of large experience and eminent success in this department, well known throughout this and adjoining States, has accepted the chair of "Elocution and English Literature," and will hereafter be regularly at his post in the University.

By reference to the courses of study it will be seen that Elocution has been introduced as a part of the regular work of the Sophomore year and of the last term Senior. Thus the College students,belonging regularly to those classes, will have *four terms free of tuition*, instead of a few lessons with extra charge as heretofore.

Students not members of these classes, desiring to perfect themselves in this department, can, for a very trifling expense, receive instruction regularly throughout the college year.

PREPARATORY DEPARTMENT.

The Preparatory Department, designed primarily to fit students for the College proper, is at the same time a well regulated Academic Institution, offering all the advantages of a first-class Academy or Seminary, to those who wish a more thorough culture in the common English branches, than can usually be obtained in our country district schools.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies have each convenient halls, neatly fitted up and furnished, and are prosecuting their labors in their own peculiar field of College life and labor, with much energy and success. They have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions, either in books or money, will be gratefully received and wisely applied.

RHETORICAL PRIZES.

During Commencement Week, the Faculty will award three prizes.—One to the Freshman Class, for the best Declamation; one to the Sophomore Class, for the best Essay; and one to the Junior Class for the best Original Oration. Each class will be entitled to two contestants. The Conference visitors will constitute the Board of Judges.

ENDOWMENT, &C.

The permanent funds of the Institution, including Funded Endowments, Bonds and other Securities, Lands, Grounds, Buildings, Museums, Apparatus, &c., &c., may now be safely estimated at nearly $200,000, unincumbered by debts or liabilities of any kind

COLLEGE EDIFICE.

This is beautifully located in the Northern part of the City, in a beautiful campus of ten acres of ground, adorned with young forest and ornamental trees, directly on the line of the

Bloomington & Normal Street Railroad, thus rendering it easy of access from any part of the two cities. The present building is comfortable and convenient, affording ample facilities for the accommodation of Two Hundred and Fifty students.

A second University Building—a model of taste and beauty—of imposing dimensions, (70 by 140 feet, five stories in height,) has been commenced. The basement walls have been already laid, and by the terms of Contract, the building is to be inclosed and externally completed by the 1st of January, 1871. It is confidently believed that this will be second to no similar building in the State in architectural beauty and internal convenience.

BOARDING.

Good Boarding can be obtained in respectable private families, in the city, at prices ranging from $4 to $5 per week. Students board themselves, satisfactorly, in rented rooms, at $2 per week.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Punctuality in attendance at all College exercises, and careful observance of study hours, and gentlemanly deportment, are required of every student. Visits of pleasure, gathering in groups, taking amusements on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No student who occasions trouble in any of these particulars, will be suffered to remain to exert on others his corrupting influence; but justice to our young men demands that we should note the fact that such is the *esprit du corps* and high moral sentiment which prevail among them, that written laws are practically superfluous; since they will not tolerate the degrading and immoral practices which have sometimes brought disgrace upon our best colleges.

GENERAL REMARKS.

The number of students in the present catalogue includes the attendance of only three Terms instead of four, as it has been necessary to change the time of publication from the beginning to the close of the College year, in order to meet the demand for catalogues. This fact will account for the apparent decrease of students.

☞ It is with peculiar pleasure that the fact is noted here that the Illinois Wesleyan University, by the complete organization of all the regular College Classes, the breadth and completeness of its Courses of Study, and the steadiness and firmness with which its Undergraduates are held to those Courses, in fact and not merely in name, has vindicated its right to the Collegiate title which it bears.

☞ The special attention of young men desiring to enter our College Classes is called to the regular Entrance Examinations at the beginning of the Fall Term.

☞ The *Illinois Wesleyan University* being now established upon a firm and permanent financial basis, furnishes a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their names and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors; but large amounts are still needed to furnish such endowments, Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our Country. Donations for founding *Professorships, Free Scholarships, Prizes, etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

CALENDAR FOR 1870-71.

Fall Term begins,	Tuesday, September 20th,	1870.
Entrance Examination, 9, a. m.,	Tuesday, September 20th,	"
Examinations begins.	Tuesday, December 20th,	"
Fall Term ends,	Thursday, December 22d,	"

Baccalaureate Sermon,

BY PRESIDENT O. S. MUNSELL, D. D.

Delivered in Schroder's Opera House, Sunday, June 12, 1870. *Published by Special Order of the Joint Board of Trustees and Visitors.*

"Can ye not discern the signs of the times?" Mat. 16, 3.

Young Gentlemen of the Graduating Class: The inquiry of our text seems to be peculiarly pertinent to the circumstances of the hour, and suggests wide ranges of thought which cannot be wholly without significance to you, as you stand on the border line that separates your years of preparatory collegiate study and discipline from life's sterner duties which now invite your not unwilling footsteps. These words of the master suggest, not obscurely, the almost priceless value of that human prescience, forecast or wisdom which, while it seems to be the peculiar inheritance of a favored few of the sons of men, is yet the one pressing want of the multitude who, in the sunny spring-time of youth and hope, launch their frail barques on the ocean of life only to founder on the stormy sea, or to strew the thither shore with the sad wrecks of ruined hopes, wasted lives, and lost souls. You too are preparing to launch out on that, to you, untried sea; shall it be to land your barques with all their precious cargoes of immortal hopes safely on that thither shore, or shall it be to add yet other wrecks to the multitudes that the dark waters of oblivion hide from our sight to-day.

Pause with me then, to-day, while I press the question of the Master.

"Can ye not discern the signs of the times?"

Christ assumes in these words that man need not, and ought not, to go forth blindly to the battle field of life, as an ox is led to the shambles, but that he should go, with a wise prescience of the world into which he is about to enter,—of the work he ought to do, and of the means at his command for worthily accomplishing life's grand mission. We invite you therefore

I "*To Consider the Problem of Humanity.*"

God created man for wise, noble, glorious purposes, which neither man nor devil shall be able, in the end, to defeat, however much the scarcely less than omnipotent, free voluntary agency of either or both may, for the time being, depart from the path in which the wisdom and goodness of God invite them to walk.

This purpose, viewed from the human stand point, could be nought else than the manifestation in action—the visible realization under finite forms,—of the infinite fullness, perfection, and self-sufficiency of the Divine nature, in all its varied elements and attributes. Hence, we are told, "that God created man in His own image and likeness," which, whatever it may or may not include, involves the assertion that the whole spiritual or mental nature of man, as contra-distinguished from his physical organism, was a reproduction under finite forms and conditions, of the Divine Nature. Accordingly, we are told in the Scriptures, that God is, like man, an intelligent, affectional, and voluntary Being, that He *thinks*, *knows*, *loves*, *hates*, and *wills*; or in other words that He is an intelligent, emotional, voluntary, *moral* Agent, and that in Him the moral element is supreme. From this stand point, the conclusion is direct and irresistable, that the purpose of God in the creation of man could be nothing less, and nothing else, than the evolution of His own *infinite moral* perfections under *finite* forms; and, consequently, under conditions that necessitated results exposed to the accidents, the errors, the imperfections which, inhere in the finite, in virtue of the fact that it is finite; and this liability of the finite to accident, to variation, to error and to sin, could serve only to unfold new occasions for the manifestation of the infinite wisdom, infinite power, infinite goodness, and infinite mercy of God. For example, angels and devils alike are familiar with the infinite *wisdom*, the infinite *power*, and the infinite *holiness* of Jehovah of Hosts, but neither angel nor devil knew or could have suspected the infinite fullness and infinite depths of *mercy* dwelling in God, until this glorious attribute was manifested in the gift of His Son to die, a ransom for a fallen race.

The Apostle then expresses in grand simplicity the fullness and the grandeur of *man's mission* upon earth when he declares us to be *co-workers with God* in the solution of His infinitely glorious plans. God is, in the highest sense, a King, and in the exercise of His royal prerogatives and the evolution of His divine plans, He grasps every element of power in heaven, earth, or hell. There is none so exalted that He cannot challenge his obedience, none so little, so worthless, so helpless, that He has not a place for him in the evolution of His wondrous purposes. The crowned monarch on his throne, the crippled beggar on the dunghill, the lion of the forest, and the mote in the sunbeam, are individually recognized in the plan and evolution of this mighty movement, and not a single sparrow can fall lifeless from its native tree without His knowledge and permission. But our thought falls infinitely below the grandeur of our theme, if we fail distinctly to grasp the conception that the real *integers* or *factors* in this problem are *angels*, *men and devils;* that is, *intelligent*, *emotional*, *voluntary*, *moral agents*, endowed with the *omnipotence* of a free will, absolutely sovereign in *its own finite* sphere. He dwarfs and dishonors God, who *subjugates* the will of man, and *necessitates* its volitions in order to meet the necessities of the Divine plans. It is not the crowning glory of our God, that He rules over the circling stars in their courses, and moulds and controls their orbits at his will, since in them, is no power to resist the laws which He has impressed upon them,—that crowning glory only beams upon us, when we conceive Him as creating a universe of *intelligent*, *moral agents*, endow-

ing, nay arming them with the attribute of a free or non-necessitated volition, sovereign in its own sphere, not only as against man, angel and devil, but as against Himself; and then, while he respects with infinite delicacy, this freedom of the moral agent: grasps and comprehends it in the vast plans He is working out, so that even the perversity of wicked men and devils shall in the end be made to subserve his Divine purpose, viz:—The perfect manifestation under finite forms and conditions of the infinite fullness and perfections of the Divine nature. Accordingly God tells us in his word, that he maketh the wrath of man to praise Him, and the remainder of wrath, He restrains.

The problem of Humanity then as it emerges into Consciousness and as it is revealed upon the pages of God's Word, involves simply the evolution in due order and proportion of all the genetic forces and potencies of the human personality, in its relations *to nature to Humanity* and to *God*. The central idea or key note of this evolution is obviously the eternal approximation of the Human to the Divine, by the perpetual self-evolution of the individual forces of the finite personality, in harmonious co-ordination with the forces of nature, on the one hand, and the equal and co-ordinate rights of self evolution of our fellow men, on the other, each individual normally tending towards God and a perfected humanity, in proportion,

First: As he acquires a legitimate intelligent sovereignty over Nature, reasserting through Christ, that dominion lost in Adam.

Secondly: As he acquires dominion over himself, bringing all lower impulses of his complex being in subjection to the higher, evolving and perfecting at the same time every personal element of power, and every talent with which God has endowed him, to its utmost legitimate development in proper co-ordination in the hierarchy of the soul.

Thirdly: As he brings to bear upon society, personally, all the elements of his soul-life, as a co-worker with God in the evolution of the problem of humanity; recognizing in himself, an indispensable factor to its success, however humble his sphere, or however limited his powers.

But if such, young gentlemen, be the real problem, you are called upon to solve, it is obvious as the sunlight, that there is a world of meaning in the inquiry of our text, "Can ye not discern the signs of the times?" God has endowed you, not with the blind instinct of the mole, the bat or the bee, but with an intelligence, a comprehension, and a prescience kindred to his own; and He would have you use that intelligence, that prescience in determining wisely the precise status of the great battle of the ages, that when you enter the lists and unsheath your swords, it may not only be on the side of truth and right—of Humanity and of God—but that it may be at *that* time and place, and under *those* conditions which will insure the richest results. Had Marshal Blucher entered the field of Waterloo in the rear of Wellington, instead of on the flank, and in the rear of Napoleon, the map of Europe and the destinies of the world had been changed; but he planned wisely and well, and triumphant victory was his just reward. Perchance it may be yours to stand a second Blucher on the verge of some mightier Waterloo; and if so, shall it be with as wise a prescience and with as dauntless a courage as that which guided the great Prussian

Field Marshal to victory in that battle of the ages? If so, like him, you must study wisely, and comprehend well, not only the grand problem of Humanity; but you must master the actual progress of the battle, and the relations of the contestants, and seize upon the key note of the whole movement, so that when the hour comes that you must strike, you shall strike, not as one that idly beateth the air, but as Blücher struck on the field of Waterloo.

We invite you then:

II. *To scan the battlefield of the Ages to-day, and with me, read, if we may, the Signs of the Times.*

No man can read human history to any real purpose, who does not, to some extent at least, comprehend its grand central truth, that all true history is a record of the various steps and stages in the evolution of the problem of Humanity, and that, however complicated its tangled threads may seem to be, there is yet a golden clue of unity running through it, along the line of which the resultant motion of the race as a whole, tends ever towards the goal of Humanity. Doubtless the all-seeing eye of God sees progress, where, to the human eye, all is chaos and blanke confusion. Yet he is but a blind and faithless student of history who does not and cannot see real progress as he traces the lines of history from Egypt to Persia, from Persia to Greece, from Greece to Rome, from Rome to Mediæval Europe, and from Europe to America.

The problem, young gentlemen, is complex, yet if you seize clearly its central thought, the solution, if not easy, is at least certain and satisfactory. That central thought you have already seen to be the evolution or manifestation of the Divine Attributes and perfections under finite forms; involving the creation of a race of intelligent Moral Agents in the image and likeness of God, the preparation of an adequate theater in the material universe, and in this, our earth, home for the evolution of the inherent forces of humanity, in due relations to Nature, to Devils, to Angels, and to God. Man's normal relation to nature was supreme dominion over it; to Devils, eternal antagonism; to Angels, co-operation; to God, supreme affection, as to an object of eternal desire. Practically, there were three factors only which man was called upon, normally, to comprehend and evolve, *viz*: Nature, man, and God. Satan, the arch-enemy alike of God and man, however, succeeded in defeating the first movement of humanity, under a dispensation of perfect innocence and perfect obedience. Yet his triumph was but seeming. In heaven, *i. e.* in other spheres of the Universe, God had evolved and manifested His essential character as a God of Holiness and inflexible justice; Satan's seeming triumph in Eden only prepared the way for the manifestation of a new Divine Attribute, mercy; and for the evolution of a new and higher manifestation of the infinite wisdom of God in carrying out his own Divine plans, not by the exercise of his infinite power, as a sovereign, but of His infinite wisdom as a leader, and his infinite love and mercy as a Father. Man went forth from Eden a sin-cursed exile, to subdue a sin-cursed earth, and to evolve from the broken, disordered, and fragmentary elements of his once God-like but now fallen humanity, a new and higher order, and beauty, and a more divine symmetry, through the ministry of temptation

and suffering, on the one hand, and the ministry of an incarnated Divinity, co-working with man in the evolution of the new problem of humanity on the other. In Eden, man stood or fell in his own strength, unaided by any higher power; in banishment, man stands on the rock Christ Jesus sustained, if he will to stand, by the ever present wisdom and strength of the Divine Spirit that ever helpeth our infirmities.

We have said, and we repeat it, the problem of humanity involved *the evolution, the comprehension, and the realization* of three grand elements or factors, *viz*: Man, Nature, and God. But man realizes any thought or idea only as he comprehends it; and he can comprehend it, in consequence of the limitations of his finite being, not as a whole or entirety in all its proper normal relations, but as complex of parts, each of which must be studied and mastered separately and then combined as one organic whole by a subsequent act of thought. For example, we can comprehend any concrete object, as a house, only by studying all its parts in detail, and then bringing these details into the unity of a single concept. Nor is this all, our concepts are individual. No two men ever saw the same rainbow, because no two men ever looked at one form precisely at the same stand point, nor at the same angle of vision. Humanity, therefore, must evolve, comprehend, and realize these essential factors of its thought, *viz*: Man, Nature, and God, by taking them up seperately and successively, and thus (if possible) evolving and exhausting their values, leaving to the future the work of combining the resultant products into one grand organic whole. Practically, in human history, *nations* and *races* of *men* actually represent *organic* or *generic ideas* in this process of evolution. And

1. We note the patent fact that history begins in Asia, with a national life and civilization based upon the idea of the Divine; or in other words the government, laws, and worship of all the great Eastern Monarchies of Chaldea, Persia, and India were based upon a system of Pantheism, more or less absolute. Of this form of human civilization, India is at once the type and the focus. Its whole social, national and religious life is permeated by, and based upon the conception that God alone is real, and that man and nature are but illusions; or, to use an Indian illustration, God is the ocean, man the bubble that sparkles on its surface for a moment only to sink back into its bosom. Consequently India, with a literature as old as that of the Hebrews, and a civilization older than that of Greece, has no history, or rather I should say that its history, as recorded by its own historians, is a history of the successive incarnations of its Gods, and not of the acts and deeds of its kings, conquerors and statesmen. Do you ask me why, young gentlemen? I answer:

The Hindoos were God intoxicated, and deemed man and nature and their acts unworthy of remembrance.

2. We note the fact that in Greece we have a corresponding evolution of a national life and civilization based upon the idea of Humanity. There man occupied the central place in the hierarchy of thought, and God and Nature were but subordinate elements, nothing more, in fact, than mere shadows in the back ground of the picture. Grecian gods were but deified men, and Grecian sci-

ence culminated in Socrates, who taught that "The only proper study of mankind is man." As in Indian history we find no names of kings, conquerors or statesmen, so in Grecian we find no names of God save the names of deified men possessing purely human attributes and passions.

In India all government was a theocratic despotism, the monarch was a king and priest, because he was himself an incarnation of the deity, or the descendant of such an incarnation. In Greece, on the contrary, all government was, or tended to, an actual democracy based upon absolute manhood and absolute equality. The result in either case was failure. God conceived apart from man is an incomprehensible mystery; yet India has not lived in vain, since she has demonstrated the failure of Pantheism as a basis of human evolution. Greece, too, lived not in vain, for she, in turn, demonstrated that humanity, without a *real personal God* is hopelessly orphaned and helplessly imbecile to work out the problem of humanity. Each apart and the two combined, as Rome sought alike in her government and in her Pantheon to combine them, demonstrate conclusively that unaided human wisdom, power and virtue cannot solve the grand problem of the ages. Fortunately God did not leave man unaided and alone to solve the problem. He left not himself without a living witness, but called Abraham from Ur, of the Chaldeas, and sent him forth to Canaan, the border land between the Pantheistic absolution of the East, and the humanitarian democracy of Greece, and there commissioned him to unfold, as His messenger and prophet, a new dispensation, viz: the doctrine of a *genuine Theism*, recognizing God as a true personality, the intelligent voluntary Creator of Man and the Universe; and recognizing man, not as a mere bubble on the ocean of being, but as an intelligent moral agent, created in the image of God, and destined to an undying existence of happiness or misery.

In the development of the Hebrew Commonwealth, we have, for the first time in History, the example of a national life and organization based upon a synthesis of the two great factors of human thought—viz, God and man, or Divinity and Humanity. The Hebrew national life was designedly narrow and restricted; its mission was not to evolve literally a new and grander empire than that of India, Greece or Rome; but to evolve principles and forces which should permeate *aggressively* the lives of all other nations, and so revolutionize Humanity by breaking down the middle walls of partition between the nations, thus reforming and destroying Babel with its confusion of tongues and bringing back not only the lost unity of Humanity with itself, but at the same time reuniting man to God in the harmony of a perfect unity of nature transcending that which existed in Eden when man, created in the image of God, reigned with vice-regal authority upon earth. This prophetic Unity finds, perhaps, its most perfect expression *in word*, in the prayer of our Lord Jesus Christ for His disciples: "Neither pray I for these alone, but for them also which shall believe on me through their word: that they all may be one, as Thou Father art in me, and I in Thee; that they also may be one in us." John, 17 c. 20 and 21 v.

The Hebrew movement culminated in the incarnation, life, sufferings, death and resurrection of our Lord Jesus Christ, who restored and actualized the lost perfect Humanity of Adam in Eden, and

exemplified, at the same time, the possibilities of that higher life which He Himself made possible to man through His own redeeming grace, whereby the indwelling presence, power and sanctifying energy of the Holy Spirit is united evermore to the soul of the believer, enabling him to say of himself what neither Adam in Eden nor the loftiest Archangel in Heaven could ever say: "I am crucified with Christ, nevertheless I live, and yet not I, but Christ liveth in me." Satan, as he stood on the verge of Eden and planned its ruin, in his mad hatred of God and man, could discern the face of the sky, but he could not discern the signs of the times, could not discern that his own wicked schemes were to result in lifting the Humanity he hated to the throne of Divinity, not only in the person of *the man* Christ Jesus, but in the persons of all the countless hosts of the elect, who, through him, shall join in the song of Moses and the Lamb, as they stand on the sea of glass mingled with fire.

God, as revealed in *the words, the doctrines* and *the life* of the Son of God, is no cold impersonal abstraction, like the Gods of Deism and of Pantheism, but is a *real, vital presence* that comes home to the inner life and consciousness of every true man. While manhood, as impersonated in Jesus, the Son of Mary of Bethlehem, transcends in purity, in nobility and in real greatness, the grandest ideals of the orator, the poet, or the metaphysician.

This incarnation of Divinity in Humanity, in the person of Jesus the Son of Mary, is the central fact in Human History, the key-note to all its movements, and the actual measure of its infinite grandeur. In the light of that fact, Earth becomes the centre, the focus, and the battle-field, not only of the ages, but of the universe. Here Good and Evil, God and Satan, must meet for their final contest, and the surpassing grandeur of the problem of Humanity is seen in the fact, that man is not only to be a co-worker with God in this battle of the Ages, this Waterloo of Sin and Satan, but *he is the prize* for which Christ entered upon the struggle.

Before the Gospel of our Lord Jesus Christ, the stone cut out of the mountain without hands, the star of Grecian and Roman Empire went down in darkness, and a new civilization and a new Europe sprang into being, based ostensibly upon the Christian faith, but it was contaminated with traces at once of Oriental Pantheism, Grecian Humanitarianism, Roman Absolutism, and Gothic and Vandalic Feudalism, and the result was Papal Rome, a crowned Anti-Christ in the Church of God, on the one hand, and a lordly aristocracy and oppressed nationalities on the other. Providentially, neither Pope nor Emperor were able to discern the signs of the times, when a little band of pilgrims, led by the unseen finger of Jehovah, fled across the great waters to lay the foundations of a truly Christian nation in the desert wilds of America. Years sped on, and the hour of trial came, and with the hour came the men, and as we read their bold words, which proclaimed a nation's birth: viz., "We hold these truths to be self-evident, that all men are created free and equal, possessing certain inalienable rights," &c., our thoughts go back to Him, Jesus the Son of Mary, who first taught men this glorious doctrine, and we rejoice that the hour has come at length when a nation is found to base its life and hopes upon this central truth of the Gospel. Our Fathers were men and

mingled clay with the gold, the silver, the brass and the iron of their national temple of life, but God rules, and slowly but surely is He casting out the alien elements, and to-day a nation stands whose Constitution has blotted out the last trace of Aristocracy, Feudalism, Caste and Priestcraft, so that at last our Constitution and our National Declaration speak one language, and that, thanks be to God, is the language of Christ. To-day, for the first time in the ages, simple manhood is the highest challenge for honor, known to earth; for simple manhood is the charter by which freemen claim the title, the honors, the rights of American citizens—than which Earth to day knows no higher rank, no prouder titles, no more priceless inheritance.

We invite you

III. *To Note the Lessons of the Hour.*

You stand to-day, young gentlemen, on the verge of life's great battle-field. Before you are the marshalled hosts, the serried ranks, the fierce conflict; and hither and thither, here and yonder, ebb and flow the phases of this many-sided, multiform contest. On the one side rest the hopes of Humanity, of truth, of right, of the universe; on the other are kingcraft, priestcraft, selfishness, sin and Satan—and yet into this surging tide of battle you must enter. Here there is, there can be no neutrality, no peace, no rest. It is a conflict that admits of no neutral ground or neutral parties, and the worst and most deadly enemies of truth, of right, of humanity, and of God, are the neutral and indifferent. It was not without reason God said to the Church of Laodicea: "I would thou wert cold or hot: so then because thou art *lukewarm*, and neither cold nor hot, I will spue thee out of my mouth." Christ, our great Captain, calls you to strike, but not to strike blindly and wildly at you know not what. This day demands thought, consideration, prescience at your hands. Can you, then, discern the signs of the times, the significance of the battle, and the true point of attack? Will you enter upon this Waterloo, a prescient Blucher, to strike a deadly blow at error, wrong and sin; or will you linger like a Fitz John Porter on the flank of either army, and sport the hours of life away, doing truth and right a more deadly injury than you could do if you led *openly* a cohort in the army of the alien. He who strikes earnestly, boldly, unselfishly, for truth, for humanity, for God, shall never strike in vain. But he who exercises an intelligent prescience, and thus to these adds wisdom, shall wear the crown of a more glorious victory.

What then, young gentlemen, are the conditions of such a success as every true man craves?

I answer:

First. Intelligent comprehension of the nature and conditions of the problem of Humanity, of the great end to which, and of the means by which, God is working out His beneficent plans in Creation, Redemption and Providence. As in the movements of a great army, success depends not only upon the General in command, upon the Colonel leading his regiment, upon the Captain at the head of his company, upon the Corporal in the midst of his squad, but also upon the private in the ranks, the powder boy in the train, and the teamster in the rear; so in the marshalled hosts of Humanity, no position is insignificant, no man superfluous. God

has a place for every man, and a man for every place; and withal, young gentleman, he has a special place for you, if you can but discern the signs of the times and catch the signal call that is summoning *you*, and *not another*, to that chosen post of duty or field of labor.

I answer:

Secondly. Success depends upon your having a just conception of your own personal adaptation to this or that special field of labor. You must comprehend the fact that an effective hod-carrier or ditcher is a more useful and more honorable member of society than a poor pettifogging lawyer, a quack doctor, or a self-seeking, worldly-minded minister. God does not measure or judge men by the shoulder-straps their vanity prompts them to wear, or the pretensions they make, but He demands their commissions under His own seal, and then He asks how they have honored those commissions in their lives. It is one of the crying sins and crimes of the age that young men do not ask: What can I best do for God and Humanity, but how can I most easily gain wealth, position and power?

I answer:

Thirdly. Earnest faith in Truth, in Humanity, and in God, are essential to a truly noble, truly successful life. Two principles have contested for empire in the human soul: viz., *Principle* and *Policy*. The one asks: What is Truth? What is Right? What is Duty? leaving results to God. The other, constituting itself the guardian at once of Humanity and of God, asks: How shall I secure my own interests and protect the interests of Humanity and of God? as if Humanity and God rested their hopes upon the wisdom of a single, self-sufficient man or clique of men.

Young gentlemen: It is rarely difficult in any concrete instance to determine what is truth, what is right, what is duty, if you shut out self on the one hand, and human policy, or so-called statesmanship, on the other; but all experience proves that the moment these questions are ignored and the more popular questions asked: viz., What is best? What is politic? under the circumstances, we embark upon a shoreless sea without chart or compass. For example, had our Fathers, in the Constitutional Convention of '88, simply asked: What is Right? What is Duty? in reference to African slavery, their own immortal Declaration of Independence would have answered: It is the will of God that ye break every yoke: but they asked, in fact, what is best under the circumstances, and the result I need not tell. The immortal Jefferson could write: "I tremble for my country when I look upon a slave and remember that God is just;" and yet Jefferson could compromise with slavery and help to perpetuate it, on the plea of expediency.

Young gentlemen: Jefferson had reason to tremble; and as a nation we have paid the penalty of compromising with wrong and sin; we have paid it in treasure, in blood, and in tears. Our Fathers had been more wise to have freed the few slaves of that day, even had it been at the price of the weight of each in coined gold, than to have compromised with sin. And now the question recurs, and for the last time, in these my parting words to you,

"Ye can discern the face of the Heavens; can ye not discern the signs of the times?" They are pregnant with meaning; and history, experience, and the Word of God, stand with index fingers pointing to the significant words of one of earth's noblest sons, who said: "One earnest soul, plus Jehovah, is a majority on any question." Ask not, then, in any case: What is *best?* What is *politic?* but in all cases: What is Right? What is Duty And then unhesitatingly go forward, with a firm faith—

"That the day shall yet appear,
When the might with the right
And the truth shall be,
And come what there may
To stand in the way,
That day the world shall see."

COURSES OF STUDY.

SCIENTIFIC AND CLASSICAL.

FIRST YEAR PREPARATORY.

[SCIENTIFIC AND CLASSICAL.]

FIRST TERM.

English Grammar—Orthography, - - *Greene*
Geography, - - - - - *Mitchell*
Arithmetic, - - - - *Robinson*
English Exercises.

SECOND TERM.

English Grammar—Etymology, - - *Greene*
Geography, - - - - *Mitchell*
Arithmetic, - - - - - *Robinson*
English Exercises.

THIRD TERM.

English Grammar—Syntax, - - *Greene*
Geography, reviewed, - - - *Mitchell*
Arithmetic, - - - - *Robinson*
English Exercises.

SECOND YEAR PREPARATORY.

FIRST TERM.

SCIENTIFIC.	CLASSICAL.
English Analysis. *Greene*	English Analysis, *Greene*
Natural Philosophy, *Rolfe & Gillet*	Natural Philosophy, *Rolfe & Gillet*
Mental Arith., *Robinson*	Latin Grammar, *Harkness*

English Exercises.

SECOND TERM.

English Composition.	English Composition,
Physical Geog., *Cornell*	Physical Geography, *Cornell*
Algebra—Elements, *Robinson*	Latin Reader, *Harkness*

English Exercises.

THIRD TERM.

Chemistry, *Rolfe & Gillet*	Chemistry, *Rolfe & Gillet*
History of United States *Anderson*	History of United States, *Anderson*
Algebra, *Robinson*	Latin Reader, *Harkness*

English Exercises.

THIRD YEAR PREPARATORY.

CLASSICAL.

FIRST TERM.

Cæsar,	*Hanson's Prose Book*
Greek,	*Hadley's Grammar*
Mental Arithmetic,	*Robinson*

Declamation and Composition.

SECOND TERM.

Cæsar,	*Hanson's Prose Book*
Greek,	*Whiton's Exercises*
Algebra,	*Robinson*

Declamation and Composition.

THIRD TERM.

Cicero's Orations,	*Hanson's Prose Book*
Greek,	*Whiton's Exercises*
Algebra,	*Robinson*

Declamation and Composition.

COLLEGIATE.

FRESHMAN YEAR.

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
Algebra,	*Robinson*	Algebra,	*Robinson*
Civil Government,	*Townsend*	Cicero de Senectute et Amicitia,	*Anthon*
Latin Grammar, (or English Language.)	*Harkness*	Zenophon's Anabasis, or Cyropædia,	*Boise*
Lectures on Civil Governm't		Lectures on Roman History	

Declamation and Composition.

SECOND TERM.

Geometry,	*Greenleaf*	Geometry,	*Greenleaf*
Botany,	*Gray*	Æneid of Virgil,	*Anthon*
Latin Reader, (or Rhetoric.)	*Harkness*	Zenophon's Memorabilia of Socrates.	
Lectures on Botany,		Lectures on Grecian History and Comparative Phonology	

Declamation and Composition.

THIRD TERM.

Algebra, completed,	*Robinson*	Algebra, completed,	*Robinson*
Botany,	*Gray*	Virgil,	*Anthon*
Latin Reader, (or Rhetoric.)	*Harkness*	Homer's Iliad,	*Anthon*
Lectures on English Language.		Lectures on Classic Mythology.	

Declamation and Composition.

SOPHOMORE YEAR.

FIRST TERM.

SCIENTIFIC.	CLASSICAL.
Geometry—Solid, *Greenleaf*	Geometry—Solid, *Greenleaf*
Cæsar, *Hanson's Prose*	Tacitus—Germania et Agricola, *Anthon*
(or Astronomy,)	Herodotus, *Johnson*
Physiology, *Draper*	Lectures—Latin Language and Literature.
Lectures on Cellular Histology.	

Elocution—Orthoepy and Vocal Culture.

SECOND TERM.

Trigonometry, *Robinson*	Trigonometry, *Robinson*
Cæsar, *Hanson's Prose*	Livy *Lincoln*
Comparative Anatomy, *Agassiz*	Gorgias of Plato, *Woolsey*
Lectures—Vertebrate Skeleton.	Lectures—Greek Literature.

Rhetorical Exercises.

THIRD TERM.

Analytics, *Olney*	Analytics, *Olney*
General History, *Anderson*	General History, *Anderson*
Cicero's Orations, *Hanson's Prose*	Horace—Odes, *Anthon*
(or Entomology.)	Demosthenes de Corona, *Champlin*

Lectures on History of Mathematics.

Lectures on Insects Injurious to Vegetation.

Rhetorical Exercises.

JUNIOR YEAR.

FIRST TERM.

SCIENTIFIC.		CLASSICAL.	
Mechanics,	*Silliman*	Mechanics,	*Silliman*
Cicero de Senectute et Amicitia, (or Calculus,)		Quintilian.	
German,	*Woodbury*	Physiology,	*Draper*
Evidences of Christianity,	*Hopkins*	Evidences of Christianity,	*Hopkins*

Lectures on Science of Language.

Rhetorical Exercises.

SECOND TERM.

Molecular Physics,	*Silliman*	Molecular Physics,	*Silliman*
Political Economy,	*Wayland*	Political Economy,	*Wayland*
German,	*Woodbury*	Botany,	*Gray*

Lectures on Political Economy.

Elocution.

THIRD TERM.

Chemistry,	*Cooke*	Chemistry,	*Cooke*
Astronomy,	*Ray*	Astronomy,	*Ray*
German,	*Woodbury*	Prometheus of Eschylus,	*Woolsey*
Surveying, (Optional.)	*Gillespie*	Surveying, (Optional,)	*Gillespie*

Lectures on Astronomy.

Lectures on Agricultural Chemistry.

Rhetorical Exercises.

SENIOR YEAR.

[SCIENTIFIC AND CLASSICAL.]

FIRST TERM.

Mineralogy, - - - - - - - - *Dana*
Law of Nations, - - - - - - - *Vattel*
English Literature.
Rhetorical Exercises.

SECOND TERM.

Geology, - - - - - - - - - *Dana*
Rhetoric, - - - - - - - - *Whately*
Psychology, - - - - - - - - *Munsell*
History of Philosophy, - - - - - *Lectures*
Rhetorical Exercises.

THIRD TERM.

Logic, - - - - - - - - - *Coppee*
Moral Science, - - - - - - - *Wayland*
Geology, - - - - - - - - *Lectures*
Elocution—Dramatic Reading, Reading from Shakespeare and the Bible.

PROGRAMME OF DAILY RECITATIONS FOR THE COLLEGIATE YEAR 1871–72.

CLASS.	HOUR.	FIRST TERM.	SECOND TERM.	THIRD TERM.
PREPARATORY	1	Greek Grammar.	English Composition. Geography.	Cicero.
	2	Natural Philosophy. Orthography.	Etymology. Physical Geography.	Chemistry. Greek Reader.
	3	Mental Arithmetic. Latin Grammar.	Algebra. Latin Reader.	History, U. S.
	4	Arithmetic. Cæsar.	Arithmetic. Cæsar	Arithmetic. Syntax.
	5	Geography. Analysis.	Greek Reader.	Latin Reader. Algebra. Geography.
FRESHMAN.	1	Cicero. English Language.	Botany.	Algebra.
	2	Algebra.	Geometry.	Virgil.
	3	Cyropædia.	Rhetoric. Memorabilia.	Botany.
	4	Civil Government.		Homer.
	5		Virgil.	Rhetoric.
SOPHOMORE.	1	Physiology.	Trigonometry.	Demosthenes. Entomology.
	2	Tacitus.	Livy.	General History.
	3	Elocution.		Analytics.

	4	English Literature.	Rhetoric.	Logic.
	5	Laws of Nations.	Psychology.	Moral Science.

GENERAL INFORMATION.

EXPENSES.

Preparatory and Collegiate.

For Fall Term :—

Tuition in English Preparatory Department, : :	$10 00
" in Classical Preparatory, and Collegiate Departments, : : : : :	12 00

For Winter Term :—

Tuition in English Preparatory Department, : :	9 00
" in Classical Preparatory, and Collegiate Departments, : : : : : :	10 50

For Summer Term :—

Tuition in English Preparatory Department, : :	9 00
" in Classical Preparatory, and Collegiate Departments, : : : : : :	10 50

No Deductions will be made, except in cases of protracted sickness, or of students entering after the close of the third week of the term, who will be charged from time of entrance.

Tuition required in advance, invariably.

LOCATION.

The Illinois Wesleyan University is located in the beautiful and rapidly growing city of Bloomington, having already a population of nearly 18,000, at the junction of the "Illinois Central," the "Chicago, Alton and St. Louis," "Jacksonville and St. Louis," "Indianapolis, Bloomington and Western," and the "Lafayette, Bloomington and and Mississippi Railroads"—being the center of the Railroad system of the State—in a healthful and delightful region of the country, diversified with native forests, extensive nurseries, and rolling prairies, and being one of the richest and most thickly settled agricultural districts in the United States.

Our inland position, the enterprise and intelligence of our community, the high tone of Christian morals among us, and the remarkable healthfulness of our city and its vicinity, offer peculiar inducements to such as seek the advantages of such an institution.

PATRONAGE.

The University is under the joint patronage of the Illinois and Central Illinois Annual Conferences of the Methodist Episcopal Church, which annually appoint Visiting Committees to supervise the examinations and general management of the institution, in conjunction with the Board of Trustees, thus offering to the public strong guarantees of the high moral tone of the instructions imparted within its halls.

LIBRARY.

Valuable additions have been made during the year to the Miscellaneous and Scientific Library of the Institution.

APPARATUS.

Considerable additions have lately been made to the already valuable Chemical, Philosophical and Astronomical Apparatus, though the increasing necessities of the Institution demand additional facilities in this department, which we trust the generosity of the friends of the University will soon supply.

MUSEUM.

The Museum of Natural History is steadily growing—comprising over four thousand specimens in Geology and Palæontology; two thousand five hundred Marine, and one thousand Fresh Water and Land Shells; a valuable Botanical collection, representing nearly the entire Flora of the State, donated by Dr. George Vasey, which he generously proposes to complete; about two hundred beautiful specimens in Ornithology, prepared and presented by Mr. R. H. Holder; various specimens of Mammalogy and Herpetology; a valuable Entomological collection, prepared and presented by the late Dr. Walsh, and a fine collection of native and foreign minerals from the Smithsonian Institute of Washington. It now affords excellent facilities for the practical study of Natural History in its various departments.

RELIGIOUS INSTRUCTION.

While all sectarianism will be rigidly excluded, the Faculty will, on all fitting occasions, strive to inculcate the principles not only of a pure morality, but of an Evangelical Christianity. Students will be required to attend some place of public worship on the Sabbath, such as their own preferences may dictate or their parents or guardians designate. They will also be required to attend the regular daily worship in the College Chapel.

The "CHRISTIAN SOCIETY OF INQUIRY" has sustained a regular weekly prayer meeting, which has been well attended, and, in connection with the religious efforts of the Churches, has resulted, under the blessing of God, in the conversion of a number of our Students.

LECTURES.

Regular courses of lectures will be delivered in connection with the recitations in the departments of Natural Science, Classics, Applied Mathematics, and of Mental and Moral Philosophy. Sabbath lectures, suited to the time and place, are delivered in the afternoon of each Sabbath, in the College Chapel, which have been of decided profit and interest.

EXAMINATIONS.

There will be a regular Public Examination of all the Classes at the close of each term; and Students will be advanced only after such examination. No student will be advanced whose average standing falls below the minimum established by the Faculty.

TEXT BOOKS.

All the Text-Books used in the University can be obtained at reasonable rates in the city.

COURSES OF STUDY.

These have been arranged with much care, after a close comparison of the standards of the best institutions of our country, and are designed to meet the varied wants of the youth of our rapidly developing commonwealth. We now offer to those desiring an education, *Four Courses of Study*—two Classical and two Scientific.

I.—The Regular Classical Course.

II.—A Classical Course, in which the Student may elect certain Sciences, in place of a Term of Latin and Greek respectively:—the successful candidate in either of these Courses being entitled to the degree of *Bachelor of Arts*, (A. B.)

III.—The Scientific Course, including German.

IV.—A Scientific Course, in which the Student may elect the *Latin* in place of certain of the Sciences—the successful candidate in either of the two last named Courses being entitled to the degree of *Bachelor of Science*, (B. S.)

Attention is invited to the special facilities offered for the practical study of the Natural Sciences—our course of study in that department being more *extensive* and more *thourough* than that of any similar institution in the State.

☞The curriculum in the Scientific Department has been rearranged with special reference to the wants of the large class of students whose time, means, or other circumstances do not admit of their pursuing the regular collegiate course.☜ It is designed to discipline the mind and prepare those completing it for teaching and for the ordinary pursuits of life. It embraces all the studies of the Regular Course, except the ancient languages, together with many special studies deemed desirable, and can be completed in four years.

The Classical Course, it will be observed, is thorough and complete, comparing favorably with that of our older Universities. It includes a course of four years, in addition to the usual Preparatory studies, and entitles the student to the degree of Bachelor of Arts.

As the institution grows older, we are gradually approximating the desirable end primarily set forth in the character of a University, viz: that our students should complete the classics. The experience of ages,the honors accorded by similar institutions in all countries, together with the discipline, culture and correct use of language acquired—all are motives for the student to take a little more time, make an increased effort, and bear away from his Alma Mater its highest honors.

DEGREES.

The Degree of A. M. (*Master of Arts*) is conferred on every *Bachelor of Arts* of three years' standing who, in the interval, has sustained a good moral character.

Application should be made personally, or by letter, at least two weeks before Commencement. The usual fee for the Diploma is payable in advance.

COMPOSITION AND ELOCUTION.

Regular exercises in English Composition and Declamation are required of *all* the students of the Institution. Valuable prizes are offered to those excelling in these departments. Attention is called to the special facilities in the department of Elocution.

By reference to the Courses of Study, it will be seen that Elocution has been introduced as a part of the regular work of the Sophomore, Junior and Senior years. Thus the College Students, belonging regularly to those classes, will have *three terms, free of tuition*, instead of a few lessons with extra charge, as heretofore.

Students not members of these classes, desiring to perfect themselves in this department, can, for a very trifling expense, receive instruction regularly throughout the college year.

PREPARATORY DEPARTMENT.

The Preparatory Department, designed primarily to fit students for the College proper, is at the same time a well regulated Academic Institution, offering all the advantages of a first-class Academy or Seminary, to those who wish a more thorough culture in the common English Branches, than can usually be obtained in our country district schools.

LITERARY SOCIETIES.

The "Belles Lettres" and "Munsellian" Literary Societies have each convenient halls, neatly fitted up and furnished, and are prosecuting their labors in their own peculiar field of College life and labor, with much energy and success. They have secured the nuclei of good libraries, and we earnestly appeal to a generous public in their behalf. Contributions, either in books or money, will be gratefully received and wisely applied.

RHETORICAL PRIZES.

During Commencement Week, the faculty will award three prizes: One to the Freshman Class, for the best Declamation; one to the Sophomore Class, for the best Essay; and one to the Junior Class for the best Original Oration. Each class will be entitled to two contestants. The Conference visitors will constitute the Board of Judges.

ENDOWMENT, &c.

The permanent funds of the Institution, including Funded Endowments, Bonds and their Securities, Lands, Grounds, Buildings, Museums, Apparatus, &c., &c., may now be safely estimated at nearly $200,000, unincumbered by debts or liabilities of any kind.

COLLEGE BUILDINGS.

These are pleasantly located in the northern part of the city, in a beautiful Campus of ten acres of ground adorned with young forest and ornamental trees—directly on the line of the Bloomington and Normal Street Railroad—thus rendering the University easy of access from any part of the two cities.

The old University Building, though comfortable and convenient, and affording accommodations for a large number of Students, has been inadequate to meet the growing wants of our Institution. A Second University Building, of imposing dimensions, costing more than one hundred thousand dollars,—is now nearly finished externally, and will be ready for occupation this Collegiate year—1871–2. This building—of cut stone and brick, 70 by 140 feet, five stories high, with Mansard roof and five towers—is confidently believed to be second to no similar building in the State in architectural beauty and internal convenience.

Through the beneficence of Col. W. N. Coler, of Champaign, Ill., the funds are now ready for completing internally the magnificent chapel (60 by 75 feet—with galleries)—which in honor of the worthy donor, is to be named the "COLER CHAPEL."

BOARDING.

Good Boarding can be obtained in respectable private families, in the city, at prices ranging from $4 to $5 per week. Students board themselves satisfactorily, in rented rooms, at $2 per week.

GOVERNMENT.

The laws of this Institution are few and simple, but are sufficient to secure quiet and order. The object of instruction will be to form correct mental and moral habits, and to cultivate a taste for intellectual pursuits.

Puntuality in attendance at College exercises, careful observance of study hours, and gentlemanly deportment, are required of every student. Visits of pleasure, gathering in groups, taking amusement on the Sabbath day—absences from rooms at improper hours, or unpermitted absence from town—writing upon or defacing the furniture or rooms of the College or other public buildings—wearing fire-arms or other weapons—drinking intoxicating liquors, or keeping them, except by the prescription of a physician—contracting debts without the knowledge or consent of parents or guardians—using obscene or profane language—refusing compliance with any requirement of the Faculty—and all other breaches of morals or good order, or violations of gentlemanly demeanor, are strictly and totally forbidden.

No student who occasions trouble in any of these particulars, will be suffered to remain to exert on others his corrupting influence; but justice to our students demands that we should note the fact that such is the *esprit du corps* and high moral sentiment which prevail among them, that written laws are practically superfluous; since they will not tolerate the degrading and immoral practices which have sometimes brought disgrace upon our best colleges.

GENERAL REMARKS.

☞ It is with peculiar pleasure that the fact is noted here that the Illinois Wesleyan University, by the complete organization of all the regular College Classes, the breadth and completeness of its Courses of Study, and the steadiness and firmness with which its Undergraduates are held to those Courses, in fact and not merely in name, has vindicated its right to the Collegiate title which it bears.

☞ The special attention of all desiring to enter our College Classes is called to the regular Entrance Examinations at the Beginning of the Fall Term.

☞ By a late decision of the Trustees and Patronizing Conferences, ladies are now admitted to all departments of the University. Some have already entered and, by their deportment and success as students, have given no occasion to doubt the wisdom of this "advanced step" of the institution.

☞ The *Illinois Wesleyan University* being now established upon a firm and permanent financial basis, furnishes a safe investment for the donations, bequests and legacies of our friends who may wish to perpetuate their names and beneficence through future generations. Considerable amounts of money and lands have lately been secured by the *Wills* of large-hearted patrons and benefactors. but large amounts are still needed to furnish such endowments. Library, Apparatus, Museum, and other facilities as are worthy of our great Church, our great State, and the great Future of our Country. Donations for founding *Professorships, Free Scholarships, Prizes, etc.*, are earnestly invited, as being worthy objects of an intelligent Christian beneficence.

CALENDAR FOR 1871-2.

Fall Term begins,	Tuesday, September 12th,	1871.
Entrance Examination, 9 a. m.,	Tuesday, September 12th,	"
Examinations begin,	Tuesday, December 19th,	"
Fall Term ends,	Thursday, December 21st,	"

WINTER VACATION.

Winter Term begins,	Tuesday, January 2d,	1872.
Examinations begin,	Tuesday, March 19th,	"
Annual Exhibition of Belles Lettres Society,	Tuesday, March 19th,	"
Winter Term ends,	Thursday, March 21st,	"

SPRING VACATION.

Spring Term begins,	Tuesday, March 26th,	1872.
Annual Exhibition Munsellian Society, 8 p. m.,	Friday, June 7th,	"
Baccalaureate Sermon, 3:30, p. m.,	Sunday, June 16th,	"
Address before Society Christian Inquiry, 8 p. m.,	Sunday, June 16th,	"
Examinations begin,	Monday, June 17th,	"
Prize Exhibition,	Monday, June 17th,	"
Annual Meeting Trustees and Visitors, 2 p. m.,	Tuesday, June 18th,	"
Address before the University, 8 p. m.,	Tuesday, June 18th,	"
Alumni Address and Re-union, 8 p. m.,	Wednesday, June 19th,	"
Commencement 10 a. m.,	Thursday, June 20th,	"
